INTERACTIONS The politics of administration involves agency interactions with those outside the formal structure as well as interactions among those within administrative agencies.

MANAGERIAL Despite these differences, managerial skills and relevant experience are essential prerequisites to leading public agencies. Networking and organizing skills are the indispensable foundation on which actual operations are built and sustained.

LEADERSHIP There is a growing emphasis on individual character and leadership as opposed to simply managing established, routine operations.

SERVICES There is also a continuing interest in improving the quality and reliability of services provided in both public and private organizations.

STRUCTURES Another concern is the prospect of transforming organizational structures, given the many changes in information communication technology.

CHALLENGES Still other concerns for managers include the challenge of providing career development for employees and applying emergent customer service techniques to running large, complex bureaucratic organizations.
