"The presentation and practice of vocabulary and grammar are of equal importance and there is a strong focus on listening and speaking with an emphasis on 'real world' language for social situations. The listening and reading material provides fresh new angles on universal topics and students are given numerous opportunities to practise new language through a wide variety of communicative activities, many of which are personalised. face2face is also fully compatible with the Common European Framework of Reference for Languages and gives students regular opportunities to evaluate their progress." - product description.

Business Benchmark Upper Intermediate BULATS Student's Book

Developments in cultural history and literary criticism have suggested alternative ways of addressing the interpretation of reading. How did people read in the past? Where and why did they read? How were the manner and purpose of reading envisaged and recorded by contemporaries - and why? Drawing on fields as diverse as medieval pedagogy, textual bibliography, the history of science, and social and literary history, this collection of fourteen essays highlights both the singularity of personal reading experiences and the cultural conventions involved in reading and its perception. An introductory essay offers an important critical assessment of the various contributions to the development of the subject in recent times. This book constitutes a major addition to our understanding of the history of readers and reading.

This volume offers a comprehensive, empirical and methodological view over new scenarios recently emerged in language teaching and learning, such as blended learning, e-learning, ubiquitous, social, autonomous or lifelong learning, and also over some new (ICT-based) approaches that can support them (CALL, MALL, CLIL, LMOOCs).

The Practice and Representation of Reading in England

"[Brantlinger's] writing is admirably lucid, his knowledge impressive and his thesis a welcome reminder of the class bias that so often accompanies denunciations of popular fiction." —Publishers Weekly
"Brantlinger is adept at discussing both the fiction itself and the social environment in which that fiction was produced and disseminated. He brings to his study a thorough knowledge of traditional and contemporary scholarship, which results in an important scholarly book on Victorian fiction and its production." —Choice
"Timely, scrupulously researched, thoroughly enlightening, and steadily readable. . . . A work of agenda-setting historical scholarship." —Garrett Stewart
Fear of mass literacy stalks the pages of Patrick Brantlinger's latest book. Its central plot involves the many ways in which novels and novel reading were viewed—especially by novelists themselves—as both causes and symptoms of rotting minds and moral decay among nineteenth-century readers.

IELTS Express

Presents a five-level course for adults, which focuses on contemporary themes, language and learning styles that are relevant to adult learners. Reading on the Middle Border

This brief edition of a groundbreaking textbook addresses the need for college students to develop critical reading, writing, and thinking skills for self-defense in the contentious arena of American civic rhetoric. Designed for first-year or more advanced composition and critical thinking courses, it is one-third shorter than the original edition, more affordable for students, and easier for teachers to cover in a semester or quarter. It incorporates up-to-date new readings and analysis of controversies like the growing inequality of wealth in America and the debates in the 2008 presidential campaign, expressed in opposing viewpoints from the political left and right. Exercises help students understand the ideological positions and rhetorical patterns that underlie such opposing views. Widely debated issues of whether objectivity is possible and whether there is a liberal or conservative bias in news and entertainment media, as well as in education itself, are foregrounded as topics for rhetorical analysis.

New International Express Upper-Intermediate

A preparation course for candidates studying for the International English Language Testing System examination (IELTS)

New perspectives on teaching and working with languages in the digital era

The 3rd Edition of Literacy & Learning in the Content Areas helps readers build the knowledge, motivation, tools, and confidence they need as they integrate literacy into their middle and high school content area classrooms. Its unique approach to teaching content area literacy actively engages preservice and practicing teachers in reading and writing and the very activities that they will use to teach literacy to their own students in middle and high school classrooms. Rather than passively learning about strategies for incorporating content area literacy activities, readers get hands-on experience in such techniques as mapping/webbing, anticipation guides, booktalks, class websites, and journal writing and reflection. Readers also learn how to integrate children's and young adult literature, primary sources, biographies, essays, poetry, and online content, communities, and websites into their classrooms. Each chapter offers concrete teaching examples and practical suggestions to help make literacy relevant to students' content area learning. Author Sharon Kane demonstrates how relevant reading, writing, speaking, listening, and visual learning activities can improve learning in content area subjects and at the same time help readers meet national content knowledge standards and benchmarks.

IELTS Express

This coursebook is for adult professionals who are looking to improve their general English through topics and materials relevant to a professional context. The ten units cover a range of topics from the contemporary realities of working life, language areas (both grammar and vocabulary), and related skills directly relevant to the workplace, such as job interviews, presentations, applications, writing a professional profile. The coursebook includes interactive exercises, and comes complete with an accompanying pocket book and DVD with video clips for each unit. Suitable for self-study or classroom use.

The Reading Lesson

All the papers in the first volume of Sociological Studies are centred round the theme of social stratification.

True to Life Upper-Intermediate Teacher's Book

Discussions of class make many Americans uncomfortable. This accessible book makes class visible in everyday life. Solely identifying political and economic inequalities between classes offers an incomplete picture of class dynamics in America, and may not connect with people's lived experiences. In *Reading Classes*, Barbara Jensen explores the anguish caused by class in our society, identifying classism-or anti-working class prejudice-as a central factor in the reproduction of inequality in America. Giving voice to the experiences and inner lives of working-class people, Jensen-a community and counseling psychologist-provides an in-depth, psychologically informed examination of how class in America is created and re-created through culture, with an emphasis on how working- and middle-class cultures differ and conflict. This book is unique in its claim that working-class cultures have positive qualities that serve to keep members within them, and that can haunt those who leave them behind. Through both autobiographical reflections on her dual citizenship in the working class and middle class and the life stories of students, clients, and relatives, Jensen brings into focus the clash between the realities of working-class life and middle-class expectations for working-class people. Focusing on education, she finds that at every point in their personal development and educational history, working-class children are misunderstood, ignored, or disrespected by middle-class teachers and administrators. Education, while often hailed as a way to "cross classes," brings with it its own set of conflicts and internal struggles. These problems can lead to a divided self, resulting in alienation and suffering for the upwardly mobile student. Jensen suggests how to increase awareness of the value of working-class cultures to a truly inclusive American society at personal, professional, and societal levels.
