The Library of Congress has a wealth of information on North American Indian people but does not have a separate collection or section devoted to them. The nature of the Library's broad subject divisions, variety of formats, and methods of acquisition have dispersed relevant material among a number of divisions. This guide aims to help the researcher to encounter Indian people through the Library's collections and to enhance the Library staff's own ability to assist with that encounter. The guide is arranged by collections or divisions within the Library and focuses on American Indian and Alaska Native peoples within the United States. Each section includes an introductory description, information on using the collections and their reading room, and descriptions or annotations for selected books and collections. Sections include: (1) general collections (main reading room, catalogs and Internet access, children's literature center, local history and genealogy reading room, periodicals, microform reading room, multimedia formats); (2) rare book and special collections division; (3) manuscript division (master record of manuscript collections, register, National Union Catalog of Manuscript Collections); (4) the Law Library of Congress; (5) Prints and Photographs Division; (6) Geography and Maps Division; (7) Motion Picture, Broadcasting and Recorded Sound Division; (8) Music Division and Recorded Sound Reference Center; and (9) American Folklife Center. In addition, the guide contains "gateways," thematic summaries of major Indian subject areas in the collections. Includes an index and many photographs and illustrations. (SV)

The nation's premier private collection of Rookwood art pottery featuring American Indian portraiture is on display at the Cincinnati Art Museum from October 2007 to January 2008. Rookwood and the American Indian: Masterpieces of American Art Pottery from the James J. Gardner Collection is a remarkable exhibition catalogue that will be of interest well beyond the exhibition because of its unique subject matter. Fifty-two pieces produced by the Rookwood Pottery Company are showcased, many accompanied by black-and-white photographs of the American Indians portrayed by the ceramic artist. In addition, the catalogue includes a brief biography of each artist as well as curators' comments about the Rookwood pottery and the Indian apparel seen in the portraits. The catalogue also presents two essays. The first, "Enduring Encounters: Cincinnatians and American Indians to 1900," by ethnologist and co-curator Susan Labry Meyn, describes American Indian activities in Cincinnati from the time of the first settlers to 1900 and relates these events to national policy, such as the 1830 Indian Removal Act. Rookwood and the American Indian, by art historian Anita J. Ellis, concentrates on Rookwood's fascination with the American Indian and the economic implications of producing that line. Rookwood and the American Indian blends anthropology with art history to reveal the relationships between the white settlers and the Native Americans in general, between Cincinnati and the American Indian in particular, and ultimately between Rookwood artists and their Indian friends.

Indians of North America

The Omaha Tribe is considered by some anthropologists to be the most important and comprehensive study ever written about a Native American tribe. First published in 1911 as a report of the Bureau of American Ethnology, this classic treatise is based on twenty-nine years of study and observation in the field. "Nothing has been borrowed from other observers," Alice C. Fletcher asserts. "Only original material gathered directly from the native people has been used, and the writer has striven to make so far as possible the Omaha his own interpreter." Volume I is devoted to tribal origins and early history, beliefs about the environment, rites pertaining to the individual, tribal organization and government, the sacred pole, and the quest for food. Volume II, also available as a Bison Book, considers language, social life, music, religion, warfare, treatment of disease, and death and burial customs. Alice C. Fletcher was the foremost woman anthropologist in the United States in the nineteenth century. Francis La Flesche, a member of the Omaha tribe, worked closely with Alice Fletcher for many years and in addition produced ethnological studies of his own. His autobiographical account *The Middle Five: Indian Schoolboys of the Omaha Tribe* is also available as a Bison Book. In his introduction to this Bison Book edition, Robin Ridington focuses on the place of Fletcher and La Flesche's work in the history of anthropology and the history of anthropologists' relationships with the Omahas. Ridington is a professor of anthropology at the University of British Columbia and the author of *Little Bit Know Something: Stories in a Language of Anthropology* (1990).

Rare Americana Relating to the American Indians

This book contains the treaty U.S. President Franklin Pierce signed with the Omaha Indians in 1854, biographical sketches of chiefs who signed the treaty, and Indian folklore and songs. Illustrated and published by Native American women, and with stories and translations by Native American women, it is an early example of Native American women writing books and being involved in their production.

The Omaha Tribe

This expanded edition reflects the recent changes encountered by Native American Indians in the region.

Oo-mah-ha Ta-wa-tha (Omaha City)
