

La Diagnosi In Medicina Cinese

[#Traditional Chinese Medicine \(TCM\)](#) [#Chinese Medicine Diagnosis](#) [#TCM Assessment](#) [#Pulse Diagnosis](#) [#Tongue Diagnosis](#)

Diagnosis in Traditional Chinese Medicine (TCM) involves a comprehensive assessment of the patient's condition using techniques like pulse diagnosis, tongue diagnosis, and observation of various signs and symptoms. This holistic approach aims to identify patterns of disharmony within the body and understand the root cause of the ailment, guiding the formulation of an individualized treatment plan to restore balance and promote overall health.

The collection includes scientific, economic, and social research papers.

La diagnosi in medicina cinese

Il testo è una guida clinica e si rivolge a studenti e medici descrivendo un metodo affidabile la valutazione pulsologica. L'esame del paziente nella medicina tradizionale cinese (MTC) ha una lunga tradizione di utilizzo del polso radiale come strumento diagnostico. In questo libro vengono fornite informazioni rilevanti e accessibili per supportare l'utilizzo della diagnosi pulsologica nella pratica medica.

La diagnosi in medicina cinese

Questo volume presenta l'agopuntura e la medicina tradizionale cinese ai non addetti ai lavori, cioè a tantissimi dei nostri pazienti che vogliono approfondire le tecniche di terapia con cui si stanno curando e a tutti coloro che desiderano comprendere gli aspetti fondamentali di questa antichissima scienza che si sta diffondendo sempre più capillarmente in Occidente. Percorrendo la lunghissima storia della tradizione medica cinese dagli albori della civiltà estremo orientale fino ai nostri giorni il volume presenta i suoi principi fondamentali: la teoria yin e yang e quella dei cinque movimenti, la teoria degli organi, visceri e dei loro meridiani, la teoria del qi, del sangue e dei liquidi organici collegandole al periodo in cui sono comparse per diventare parte integrante del sapere medico. Seguendo questa impostazione storica e temporale sono gradualmente introdotti la descrizione anatomica del nostro organismo e del suo funzionamento, le cause di malattia, le loro modalità di azione, lo studio dei segni e sintomi ed infine la diagnostica che classifica le patologie seguendo criteri assai diversi da quelli della biomedicina. L'ultima parte del volume è dedicata alla descrizione delle numerose tecniche di terapia della medicina cinese che si dividono in tre gruppi: le tecniche esterne, quelle interne e quelle né interne né esterne. Le tecniche esterne agiscono dall'esterno e si fondano sulla stimolazione dei punti di agopuntura e dei loro

meridiani. Oltre all'agopuntura vengono presentate la moxibustione, la coppettazione, il massaggio e la fisiochinesiterapia, l'elettropuntura, la laserpuntura, la magnetopuntura e la chimiopuntura. Le tecniche interne agiscono dall'interno e prevedono l'assunzione di sostanze per via alimentare; comprendono la dietetica e la farmacologia, Quest'ultima sfrutta l'azione farmacologica di migliaia di sostanze medicinali naturali. Nella recente Pharmacopaea Sinica da poco pubblicata ne sono annoverate 4957. Le tecniche né interne né esterne comprendono le ginnastiche mediche qi gong e tai ji quan. Si tratta delle cosiddette discipline psicocorporee che utilizzano movimenti che si fondano sulla teoria dei meridiani armonizzandoli con le fasi respiratorie e con la concentrazione mentale attraverso una sorta di training autogeno. La diagnosi in medicina tradizionale cinese e la terapia delle patologie più comuni. Testo cinese a fronte

Easily accessible and heavily illustrated, this complete guide to diagnosis in Chinese Medicine places an emphasis on "real world" issues. Focusing on clear interpretations of signs and symptoms, it addresses the practice beyond the theory and leads readers through both basic and sophisticated levels of diagnostic interpretation. Since Chinese medicine diagnosis relies on a subtle appraisal of a patient's disharmony, many factors beyond traditional Western symptoms are considered, including a patient's voice, the absence of thirst, feeling hot or cold, the patient's smell, tone of voice, and glitter of eyes. This practical resource helps readers carefully interpret of a range of nuances. Provides a clinical understanding of Traditional Chinese Medicine Offers an unparalleled depth of information that is meticulously cross-referenced Includes all the signs and symptoms, however subtle, that a modern patient may present in the clinic Provides clinical experience and understanding from a leader in the field of Chinese medicine Clearly outlines the decision-making options in key situations to help readers through the most challenging topics Logically organized so readers can quickly find the information they need in clinical situations

La diagnosi in medicina cinese

La terza edizione di La Clinica in Medicina Cinese esce dopo la scomparsa del suo autore, Giovanni Maciocia. I professionisti chiamati ad aggiornare il volume, tutti altamente qualificati e con sostanziale esperienza clinica, hanno voluto preservare l'eredità e il valore del testo originale, compiendo al contempo passi importanti per migliorarlo sia dal punto di vista pratico sia dal punto di vista educativo. Questa nuova edizione rappresenta quindi una fonte di informazioni particolarmente completa. Oltre all'aggiornamento delle fonti bibliografiche, il volume risulta arricchito per: • le Note cliniche, brevi spunti pratici scritti da Giovanni Maciocia stesso, inseriti sia all'interno dei capitoli sia nelle appendici; • le trattazioni di nuovi argomenti quali il Triplice Riscaldatore, la sessualità secondo l'ottica della medicina tradizionale cinese, una breve panoramica dell'integrazione della medicina fitoterapica cinese con l'agopuntura e la galleria "delle lingue"; • le sezioni dedicate all'interazione della medicina cinese con la medicina occidentale, anche attraverso l'aggiunta delle Red Flags, avvertenze sui sintomi che richiedano l'intervento di uno specialista di medicina occidentale. L'inserimento di schemi e di diagrammi sull'eziopatogenesi delle malattie aiutano in maniera efficace sia coloro che stanno studiando l'agopuntura e la medicina cinese, sia i medici già esperti in queste discipline, mettendo a disposizione dei lettori italiani preziose informazioni, spesso disponibili finora soltanto in lingua cinese, con un approccio clinico orientato ai pazienti occidentali.

La diagnosi in medicina tradizionale cinese

Alvaro Vaccarella, medico e giornalista, è nato a Lecco, dove vive, nel 1952. Responsabile dell'U.O. di Cardiologia Riabilitativa del presidio di Casatenovo (Lc) dell'I.N.R.C.A., (Istituto di Ricovero e Cura a carattere Scientifico), ha pubblicato numerosi articoli su riviste italiane e straniere. Profondo conoscitore del "pianeta Cina", grazie alla sua lunga collaborazione con l'Istituto Italo-Cinese e con la Fondazione Italia-Cina, ha condensato nei capitoli di questo volume il frutto di oltre trent'anni di studi ed esperienze. "E' quindi con piacere che presento al pubblico dei lettori questo agile volume, strumento quanto mai utile per coloro che vogliono conoscere e comprendere come si articola l'assistenza sanitaria nella Cina di oggi, e di come la medicina tradizionale e la medicina occidentale possano convivere e integrarsi. Al di fuori dai luoghi comuni e dagli stereotipi ancora troppo diffusi, grazie alle conoscenze maturate sul campo Alvaro Vaccarella, ha dato vita a un saggio originale e ricco di fascino. L'ago, la siringa e il fiore del susino offre dunque una panoramica ampia ed esaustiva di un aspetto del mondo cinese rimasto finora inesplorato." (dalla Presentazione di Cesare Romiti, presidente della Fondazione Italia-Cina).

La diagnosi attraverso l'esame della lingua in medicina tradizionale cinese

Il libro ha uno scopo didattico, rivolgendosi in particolare a tutti coloro che studiano l'agopuntura e le altre branche della medicina tradizionale cinese. Esso affronta l'argomento delle "Disarmonie" e si articola fondamentalmente in tre sezioni di argomenti: eziopatogenesi, diagnostica e terapeutica. Nella sezione di eziopatogenesi vengono descritte le cause di disarmonia e i meccanismi d'azione di tali fattori. Nella sezione di diagnostica vengono affrontate le principali metodiche di diagnosi: dalle regole Ba Gang alle sindromi delle sostanze fondamentali e degli Zang-fu. Inoltre vengono descritte anche

altre metodiche sviluppatasi nel corso dei millenni. Infine nell'ultima sezione vengono descritti i principi e le modalità terapeutiche, affrontando la terapia con agopuntura delle sindromi precedentemente descritte nella sezione di diagnostica.

Guida pratica all'esame del polso in medicina cinese

A detailed, clinical look at Chinese medicine. Written by world-renowned author and teacher, this comprehensive, highly illustrated, and easy-to-understand resource helps students and practitioners alike carefully interpret a range of diagnostic nuances. This new edition addresses the practice beyond the theory. -- Provided by publisher.

La medicina cinese

Questo è un manuale pratico per la diagnosi e la cura dei problemi mestruali, attraverso le teorie della Medicina Tradizionale Cinese con applicazione del massaggio TuiNa. Ricco di protocolli provenienti da ospedali di medicina tradizionale cinese di Nanjing e Beijing, è indicato ad operatori esperti o a persone con basi ben acquisite di MTC e TuiNa poiché sono date per assodate. Ogni patologia (amenorrea, dismenorrea, polimenorrea, ecc...) contiene la sua descrizione, le cause di malattia, i sintomi e i trattamenti opportuni con spiegazione per ogni manovra e ago-punto scelti. La chiarezza e la semplicità ne fa sicuramente un testo "pronto all'uso".

Medicina cinese. Diagnosi differenziale

New edition of the most comprehensive Chinese Medicine Obstetrics and Gynecology textbook in the English language World-renowned author and teacher Giovanni Maciocia gives a clear, detailed explanation of the physiology, pathology and aetiology of women's disorders in Traditional Chinese Medicine (TCM) and adapts these to Western conditions and patients. Seventy gynecological conditions are discussed in detail with consideration given to differentiation between conditions, the advised treatment using acupuncture and herbs, prevention and prognosis. Guidelines on lifestyle and use of the eight Extraordinary Vessels are provided, with case studies allowing easy application of theory to practice throughout. New for this edition: New attractive two-colour layout with book marks to ease navigation Endometriosis and its treatment now included and fully covered in a new chapter Infertility chapter includes recent research highlighting factors in infertility All prescriptions now removed from the text and attractively presented in three appendices: Patient Remedies, Prescriptions and Three Treasure Remedies "Obstetrics and Gynecology in Chinese Medicine is a paradigmatic work. It is tempered with reverence and innovation, meticulous archival attention and detailed modern clinical insight. When future generations look back at this work...they will find not only knowledge and wisdom but also reasons for inspiration and awe." From the Foreword to the first edition by Ted J. Kaptchuk, Associate Director, Centre for Alternative Medicine Research, Beth Israel Hospital; Instructor in Medicine, Harvard medical School, Boston, USA. • Physiology and pathology of women's disorders in Chinese medicine • Aetiology and diagnosis of women's disorders • Differentiation and treatment – including acupuncture, herbs and patent remedies – of 64 gynecological conditions • Prevention and prognosis for each disease • Approximately 100 case histories from the author's own practice • A detailed discussion of the use of the eight extraordinary vessels in gynecology

La pratica della vera medicina cinese. Formazione, diagnosi, terapia, ricerca

'Sometimes called coining, spooning or scraping, Gua sha is defined as instrument-assisted unidirectional press-stroking of a lubricated area of the body surface that intentionally creates 'transitory therapeutic petechiae' representing extravasation of blood in the subcutis.' Gua sha has been used for centuries in Asia, in Asian immigrant communities and by acupuncturists and practitioners of traditional East Asian medicine worldwide. With the expansion of traditional East Asian medicine, Gua sha has been used over broad geographic areas and by millions of people. It is valuable in the treatment of pain and for functional problems with impaired movement, the prevention and treatment of acute infectious illness, upper respiratory and digestive problems, and many acute or chronic disorders. Research has demonstrated Gua sha radically increases surface microperfusion that stimulates immune and anti-inflammatory responses that persist for days after treatment. The second edition expands on the history of Gua sha and similar techniques used in early Western Medicine, detailing traditional theory, purpose and application and illuminated by science that focuses its relevance to modern clinical practice as well as scholarly inquiry. This book brings the technique alive for practitioners, with clear discussion of how to do it – including correct technique, appropriate application, individualization of

treatment – and when to use it, with over 50 case examples, and superb color photographs and line drawings that demonstrate the technique. NEW TO THIS EDITION • New chapter on immediate and significant Tongue changes as a direct result of Gua sha • Research and biomechanisms • Literature review from Chinese language as well as English language medical journal database • New case studies • Over 30 color photographs

La medicina cinese per tutti

Examination of the tongue, like the pulse, is one of the principal diagnostic methods in traditional Chinese medicine. This book--newly revised in 1995--systematically describes each of the primary characteristics of the tongue (body color, shape and coating) and their significance in the clinic. It traces the historical development of tongue diagnosis and its relationship to externally- contracted disorders and the eight principals. Featured in this revised edition are 59 color plates and accompanying case histories from the author's own practice. Other aspects of tongue diagnosis newly described in this edition include the integration of tongue and pulse diagnosis; the use of the tongue in diagnosing emotional problems; tongue diagnosis and herbal treatment; the tongue in prognosis; and special considerations regarding tongue diagnosis in children.

Leggere il volto secondo la medicina tradizionale cinese

Annotation A historical and philosophical foundation to traditional medical practice in China. Ilza Veith provides an extensive introduction to this classic work in which the Yellow Emperor seeks information from his minister Ch'I-Po on all questions of health and the art of healing.

Diagnosis in Chinese Medicine

The new edition of this popular clinical text describes the application of traditional Chinese medical theory to the diagnosis and treatment of up to 48 diseases, conditions, and disorders. In addition to the existing 34 covered in the first edition, 14 new conditions and symptoms have been added.

Maciocia La Clinica in Medicina Cinese

Turn the latest research into improved patient outcomes with the #1 annual guide to internal medicine and clinical practice Written by clinicians renowned in their respective fields, CMDT offers the most current insight into symptoms, signs, epidemiology, diagnosis, and treatment for more than 1,000 diseases and disorders. You'll find concise, evidence-based answers to questions about hospital and ambulatory problems. This streamlined clinical companion is the fastest and easiest way to keep abreast of the latest diagnostic advances, prevention strategies, and cost-effective treatments. Features and content critical to clinical practice: Strong emphasis on the practical aspects of clinical diagnosis and patient management throughout the broad fields of internal medicine Full review of internal medicine and primary care topics, including gynecology and obstetrics, dermatology, neurology, ophthalmology, geriatrics, and palliative care The only text with an annual review of advances in HIV treatment Specific disease prevention information Hundreds of medication treatment tables, with indexed trade names and updated prices – plus helpful diagnostic and treatment algorithms Recent references with PMID numbers Many full-color photographs and illustrations NEW TO THIS EDITION: Update on the evaluation of chest pain New algorithms for the treatment of heart failure and NSTEMI New sections on pulmonary hypertension; treatment of pleural mesothelioma; diagnosis and treatment of subacute, postpartum, and silent thyroiditis and amiodarone- and iodine-induced thyrotoxicosis; and treatment of cryoglobulinemic vasculitis New tables on preferred initial antiretroviral regimen and fixed dose antiretroviral combinations for HIV infection, and on medications for management of diabetes Updated tables on cancer chemotherapeutic and supportive care agents Includes 5 online-only chapters at no additional cost Visit: www.AccessMedicine.com/CMDT

Homoeopathy and acupuncture accompany the ailing man in his journey towards recovery .

L'ago, la siringa e il fiore del susino

This unique visual reference presents more than 750 brilliant, four-color images of bacterial isolates commonly encountered in diagnostic microbiology and the methods used to identify them,

including microscopic and phenotypic characteristics, colony morphology, and biochemical properties. Chapters cover the most important bacterial pathogens and related organisms, including updated taxonomy, epidemiology, pathogenicity, laboratory and antibiotic susceptibility testing, and molecular biology methodology. Tables summarize and compare key biochemical reactions and other significant characteristics. New to this edition is a separate chapter covering the latest developments in total laboratory automation. The comprehensive chapter on stains, media, and reagents is now augmented with histopathology images. A new Fast Facts chapter presents tables that summarize and illustrate the most significant details for some of the more commonly encountered organisms. For the first time, this easy-to-use atlas is available digitally for enhanced searching. Color Atlas of Medical Bacteriology remains the most valuable illustrative supplement for lectures and laboratory presentations, as well as for laboratorians, clinicians, students, and anyone interested in diagnostic medical bacteriology.

La patologia secondo la medicina tradizionale cinese

Soulie de Morant's masterpiece is the most detailed study of acupuncture available in a Western language. It was nominated for a Nobel prize and provided the foundation for French acupuncture. This text is divided into 5 parts: the energetics of acupuncture, the application of the energetics, physiology, meridians and points, and treatment. This book is a unique historical document, but more than this, it is the most practical of texts and has already served a generation of clinicians well.
