Moral Issues in International Affairs

A number of eminent international scholars have come together in this volume to address the question of morality in international affairs and to explore some of the central, normative issues which arise in the context of European integration. The essays examine the general question of morality and address specific areas of concern in the proposals for further integration..

Markets and Moral Regulation

This book examines European integration and national policies on moral issues such as abortion, drugs and alcohol.

The European Union and Europe's New Regionalism

This book presents a new approach to studying the European Union's regional and global relevance. It recasts into a dynamic perspective the three most significant systemic processes that define the EU as a regionalist project: its enlargement, neighborhood, and mega-regional policies. The book argues that these processes collectively demonstrate a dynamic shift of the core tenets of European regionalism from an inward-looking process of region building to an open, selective system of global interactions.

Ethics and Foreign Policy

Democratic citizenship possible: MERVYN FROST

Rethinking Ethical Foreign Policy

This new volume moves beyond the limits of current debate to show how today's foreign policy is increasingly about values rather than interests and why ethics are now playing a central role. Rather than counterposing interests and ethics, trying to find 'hidden agendas' or emphasizing the double-standards at play in ethical foreign policy, this book brings together leading international theorists, and a variety of stimulating approaches, to develop a critical understanding of the rise of ethical foreign policy, and to analyze the limits of ethical policy-making on its own terms. They deal with the limits of 'ethical foreign policy' both in the light of the internal dynamic of these policies themselves, and with regard to the often unintended consequences of policies designed to better the world. This book also shows how the transformation of both the domestic and the international spheres of politics means that ethics has become a rallying point for non-state actors and experts who gather around values and norms in order to force institutions to justify their behavior. This process results from different structural changes and the transformation of the international system, the individualization of Western societies and the growing importance of expertise in the justification of decisions in risk adverse societies. It leads to a transformation of norms and to a redefinition of a global ethical framework that needs to be clarified. This book will be of great interest to all students and researchers of foreign policy formation, politics and international relations.

Values and Principles in European Union Foreign Policy

"This book examines the values and principles that inform EU Foreign Policy, conveying an understanding of the EU as an international actor. This volume explores the implications of these values and principles on the process of the construction of the European Union identity"--Provided by publisher.

Governing Europe

Governing Europe is the first book to systematically link Michel Foucault's hypotheses on power and 'governmentality' with the study of European integration. Through a series of empirical encounters that spans the fifty-year history of European integration, it explores both the diverse political dreams that have framed means and ends of integration and the political technologies that have made 'Europe' a calculable, administrable domain. The book illustrates how a genealogy of European integration differs from conventional approaches. By suspending the assumption that we already know what/where Europe is, it opens a space for analysis where we can ask: how did Europe come to be governed as this and not that? The themes covered by this book include: * the different constructions of Europe within discourses of modernization, democratization, insecurity and 'governance' * the imprint of modernism, liberalism, ordoliberalism, neoliberalism and crime on the identity of the European Community/European Union * the historical relationship between European government and specific technologies of power, technologies as diverse as planning, price control, transparency and benchmarking.

European Security Culture

Grounded on tenets of cultural realism and social constructivism, Monica Gariup develops a theoretical framework to enhance our understanding of security culture at the European Union level. She employs tools from political theory, linguistic analysis and international relations theory to examine the implications of discourse and practice in European Security and Defense Policy (ESDP). Innovative in scope, the volume analyzes whether elaborating a structurationist solution and proposing a discursive syntax of security makes it possible to identify and compare different types of security actors. Providing a comprehensive and objective analysis on the links and implications between the discourse and actual policy of the ESDP, this is essential reading for scholars and researchers in European politics, international relations, security and cultural studies.

Constitutionalism in Islamic Countries: Between Upheaval and Continuity

Constitutionalism in Islamic Countries: Between Upheaval and Continuity examines the question of whether something similar to an "Islamic constitutionalism" has emerged out of the political and constitutional upheaval witnessed in many parts of North Africa, the Middle East, and Central and Southern Asia. In order to identify its defining features and to assess the challenges that Islamic constitutionalism poses to established concepts of constitutionalism, this book offers an integrated analysis of the complex frameworks in Islamic countries, drawing on the methods and insights of comparative constitutional law, Islamic law, international law and legal history. European and North

American experiences are used as points of reference against which the peculiar challenges, and the specific answers given to those challenges in the countries surveyed, can be assessed. The book also examines ways in which the key concepts of constitutionalism, including fundamental rights, separation of powers, democracy and rule of law, may be adapted to an Islamic context, thus providing valuable new insights on the prospects for a genuine renaissance of constitutionalism in the Islamic world in the wake of the "Arab spring."

Deconstructing Ideal Power Europe

This book deconstructs the EU's representation as "an ideal power" in world politics through an analysis of its policy on the Southern Mediterranean before and after the Arab uprisings. It displays how the EU's "ideal" identity is reproduced vis-à-vis its Arab other, especially after the uprisings.

Security, Identity and Interests

Addresses the central problem of international relations - security - and constructs a novel framework for its analysis.

Green Giants?

An examination of current environmental policy trends in the United States and the European Union and the implications for future transatlantic and global cooperation.

The Politics of Unsustainability

Two decades after its launch by the UN Brundtland Commission, the paradigm of sustainability seems to have reached its limits. Whilst the concept figures more prominently in public debate and policy making than ever before, the ecological footprint of advanced liberal consumer societies continues to grow, and the forceful economic development of countries such as China and India reinforces concerns that the world is moving further away from, rather than closer towards the ideal of sustainability. Given the proven failure of ecological modernisation strategies to secure sustainability, the traditional question "How may our established lifestyles and socio-economic practices be made more sustainable?" needs to be supplemented by a second, equally important, question: "How do advanced modern consumer democracies try and manage to sustain what is known to be unsustainable?" Put differently, traditional research into the politics of sustainability needs to be supplemented by a new line of research into the politics of unsustainability. Exploring the recent transformation of eco-political discourses and a variety of ways in which the unfolding paradox of sustaining the unsustainable is being managed, the present volume pioneers this new research agenda. This book was previously published as a special issue of Environmental Politics.

Uniting of Europe

The University of Notre Dame Press is pleased to bring Ernst Haas's classic work on European integration, *The Uniting of Europe*, back into print. First published in 1958 and last printed in 1968, this seminal volume is the starting point for anyone interested in the pre-history of the European Union. Haas uses the European Coal and Steel Community (ECSC) as a case study of the community formation processes that occur across traditional national and state boundaries. Haas points to the ECSC as an example of an organization with the "power to redirect the loyalties and expectations of political actors." In this pathbreaking book Haas contends that, based on his observations of the actual integration process, the idea of a "united Europe" took root in the years immediately following World War II. His careful and rigorous analysis tracks the development of the ECSC, including, in his 1968 preface, a discussion of the eventual loss of the individual identity of the ECSC through its absorption into the new European Community. Featuring a new introduction by Haas analyzing the impact of his book over time, as well as an updated bibliography, *The Uniting of Europe* is a must-have for political scientists and historians of modern and contemporary Europe. This book is the inaugural volume of Notre Dame's new Contemporary European Politics and Society Series.

Complexity and Social Movements

Fusing two key concerns of contemporary sociology: globalization and its discontents, and the 'complexity turn' in social theory, authors Chesters and Welsh utilize complexity theory to analyze the shifting constellation of social movement networks that constitute opposition to neo-liberal globalization.

They explore how seemingly chaotic and highly differentiated social actors interacting globally through computer mediated communications, face-to-face gatherings and protests constitute a 'multitude' not easily grasped through established models of social and political change. Drawing upon extensive empirical research and utilizing concepts drawn from the natural and social sciences this book suggests a framework for understanding mobilization, identity formation and information flows in global social movements operating within complex societies. It suggests that this 'movement of movements' exhibits an emergent order on the edge of chaos, a turbulence that is recasting political agency in the twenty-first century.

A Europe of Neighbours?

This is a controversial work of applied legal theory, addressing urgent contemporary questions about law and the state, about the character of the UK as a state, and about the juridical character of the European Union.

Questioning Sovereignty

This is a major new reader that brings together and assesses the most influential scholarly contributions that have fashioned the debate on European integration over the past 50 years. It includes an original contribution reflecting on key issues in integration theory by Ben Rosamond.

Debates on European Integration

'The Social Construction of Europe is a wonderful tool for scholars and advanced students concerned with European integration' - Nationalism and Ethical Politics This book is the first to systematically introduce and apply a social constructivist perspective to the study of European integration. Social constructivism is carefully located in terms of its philosophical and methodological origins. The wider debates and contribution of constructivist approaches to international relations are reviewed, and the insights that might then be afforded to European studies fully explored. Highlights include: new theoretical contributions to the debate by Ernst B. Haas, Andrew Moravcsik and Steve Smith; research on key aspects of European integration and EU governance applying a variety of constructivist approaches. The Social Construction of Europe provides new and important insights to a key area of contemporary study and research.

The Social Construction of Europe

This open access book seeks to identify the ethical spirit of European Union (EU) law, a context in which we can observe a trend towards increasing references to the terms 'ethics' and 'morality'. This aspect is all the more important because EU law is now affecting more and more areas of national law, including such sensitive ones as the patentability of human life. Especially when unethical behaviour produces legal consequences, the frequent lack of clearly defined concepts remains a challenge, particularly against the background of the principle of legal certainty. This raises the question to which extent the content of these references is determined and whether it is possible to identify an ethical spirit of EU law. Answering that question, in turn, entails addressing the following questions: In references to ethics concerning EU law, can we identify references to a particular theory of practical philosophy at all; and, if so, to one or more normative ethical theories (deontology, consequentialism, or virtue ethics)? Further, should these non-legal concepts be imported in an unaltered way ("absolute approach"), or be adapted to the legal context ("relative approach")? This book explores the different layers of EU law (primary law, agreements, secondary law, and tertiary law), including the role of ethics in EU lawmaking and in EU case law, as well as the implementation of relevant EU directives in selected Member States. In addition to the above-mentioned normative philosophical lens, the book also analyzes the findings from the legal lens of EU integration, i.e., especially EU values, human rights and the cornerstone of human dignity.

Twentieth Century International Relations: Europe in the international system

This book provides an accessible introduction to diverse political economy perspectives on different aspects of European integration. It presents a critical appraisal of how scholars in the EU and US use theory to understand European integration.

The Ethical Spirit of EU Law

The notion of Normative Power Europe (NPE) is that the EU is an 'ideational' actor characterised by common principles and acting to diffuse norms within international relations. Contributors assess the impact of NPE and offer new perspectives for the future exploration of one of the most widely used ideas in the study of the EU in the last decade.

ECSA Review

An Irish quarterly review.

The Political Economy of European Integration

While skepticism about the role of moral considerations in international politics has been influential within the discipline of international relations (IR), those writing on topics such as war, peace, rights and trade up until the twentieth century took seriously the importance of ethical values and moral debates. The 1990s and 2000s have seen a substantial growth of attention to the ways in which IR conceives and analyzes themes of an ethical nature, and how issues, problems and policies involving ethics are addressed by a variety of actors within the international system. This indispensable research companion widens the perspective from 'ethics and international relations' to 'ethics in international relations', redressing the (mis)perception that ethical concepts, principles, norms and rules are not in part constitutive of the international system and the agents acting within that system. Necessarily cross-disciplinary, expertise is drawn from IR and also philosophy, political theory, religious studies, history and law, making this an ideal volume for any library reference collection.

Normative Power Europe

Die Schriftenreihe "Thematicon" präsentiert Ergebnisse der interdisziplinären Forschung aus den Bereichen Kulturwissenschaft, Recht, Politologie, Wirtschaftswissenschaften, Umweltschutz und Raumordnung. Einen besonderen Schwerpunkt bilden hier Probleme der Kommunikation zwischen Kulturen und sozialen Strukturen. Das Collegium Polonicum, eine grenzüberschreitende Einrichtung der Adam-Mickiewicz-Universität Poznań und der Europa-Universität Viadrina Frankfurt (Oder), widmet sich in Forschung und Lehre dieser Problematik.

Brexit will have significant consequences for the country, for Europe, and for global order. And yet much discussion of Brexit in the UK has focused on the causes of the vote and on its consequences for the future of British politics. This volume examines the consequences of Brexit for the future of Europe and the European Union, adopting an explicitly regional and future-oriented perspective missing from many existing analyses. Drawing on the expertise of 28 leading scholars from a range of disciplines, *Brexit and Beyond* offers various different perspectives on the future of Europe, charting the likely effects of Brexit across a range of areas, including institutional relations, political economy, law and justice, foreign affairs, democratic governance, and the idea of Europe itself. Whilst the contributors offer divergent predictions for the future of Europe after Brexit, they share the same conviction that careful scholarly analysis is in need – now more than ever – if we are to understand what lies ahead for the EU. Praise for *Brexit and Beyond* 'a wide-ranging and thought-provoking tour through the vagaries of British exit, with the question of Europe's fate never far from sight...Brexit is a wake-up call for the EU. How it responds is an open question—but respond it must. To better understand its options going forward you should turn to this book, which has also been made free online.' *Prospect Magazine* 'This book explores wonderfully well the bombshell of Brexit: is it a uniquely British phenomenon or part of a wider, existential crisis for the EU? As the tensions and complexities of the Brexit negotiations come to the fore, the collection of essays by leading scholars will prove a very valuable reference for their depth of analysis, their lucidity, and their outlining of future options.' - Kevin Featherstone, Head of the LSE European Institute, London School of Economics 'Brexit and Beyond is a must read. It moves the ongoing debate about what Brexit actually means to a whole new level. While many scholars to date have examined the reasons for the British decision to leave, the crucial question of what Brexit will mean for the future of the European project is often overlooked. No longer. *Brexit and Beyond* bundles the perspectives of leading scholars of European integration. By doing so, it provides a much needed scholarly guidepost for our understanding of the significance of Brexit, not only for the United Kingdom, but also for the future of the European continent.' - Catherine E. De Vries, Professor in the department of Government, University of Essex and Professor in the department of Political Science and Public Administration Free University Amsterdam 'Brexit and Beyond provides a fascinating (and

comprehensive) analysis on the how and why the UK has found itself on the path to exiting the European Union. The talented cast of academic contributors is drawn from a wide variety of disciplines and areas of expertise and this provides a breadth and depth to the analysis of Brexit that is unrivalled. The volume also provides large amounts of expert-informed speculation on the future of both the EU and UK and which is both stimulating and anxiety-inducing.' -Professor Richard Whitman, Head of School, Professor of Politics and International Relations, Director of the Global Europe Centre, University of Kent

The Ashgate Research Companion to Ethics and International Relations

This electronic version has been made available under a Creative Commons (BY-NC-ND) open access license. This book reviews a variety of approaches to the study of the European Union's foreign policy. Much analysis of EU foreign policy contains theoretical assumptions about the nature of the EU and its member states, their inter-relationships, the international system in which they operate and the nature of European integration. Such assumptions, when not discussed openly, often curtail debate. This book opens up this field of enquiry so students, observers and analysts of EU foreign policy can review a range of tools and theoretical templates from which the development and the trajectory of the EU's foreign policy can be studied. Situated at the interface between European studies and international relations, the book outlines how the EU relates to the rest of the world, explaining its effort towards creating a credible, effective and principled foreign, security and defence policy.

The Experiences of the 1995 Enlargement

This book analyses the Association of Southeast Asian Nations (ASEAN) as a powerful actor in International Relations by examining how the ASEAN community has evolved, looking specifically at its relationship with the EU with regards to human rights. The book adds to important contemporary debates within constructivist theory, shedding light on the need for 'critical' constructivism that emphasises language and contestation and what that may entail. On an empirical level, it challenges the idea of an 'EU-centrism,' demonstrating how ASEAN is the major driving force behind its human rights and community aspirations, as well as within the ASEAN-EU relationship. Furthermore, this book engages with the introspection surrounding constructivism by addressing the trouble with 'norms,' and instead unpacking the relationship between ASEAN and the EU to show language power in play. In particular, the book looks at how language, or rather coercive language, helps us 'see' contestation in action, something that researchers sympathetic towards the idea of ASEAN's 'resistance' have been unable to show through a focus on norms. Tracing the evolution of the ASEAN community and human rights aspirations in a new light, showing how exactly the EU remains an inspiration, but not a model, and more interestingly how ASEAN demonstrates power in the relationship, the book will be of interest to academics working on Asian Studies, European Studies, International Relations Theory and human rights.

Brexit and Beyond

What purpose does the EU serve? Why and how was it set up? How does it work? What has it already achieved for its citizens, and what new challenges does it face today? In a globalised world, can the EU compete successfully with other major economies while maintaining its social standards? How can immigration be managed? What will Europe's role be on the world stage in the years ahead? Where will the EU's boundaries be drawn? And what future is there for the euro? These are just some of the questions explored by EU expert Pascal Fontaine in this 2017 edition of his popular booklet *Europe in 12 lessons*. Pascal Fontaine is a former assistant to Jean Monnet and former professor at the Institut d'Études Politiques, Paris.

Current Publications in Legal and Related Fields

Few countries have caused or experienced more calamities in the 20th century than Germany. The country emerged from the Cold War as a newly united and sovereign state, eventually becoming Europe's indispensable partner for all major domestic and foreign policy initiatives. This handbook provides a comprehensive overview of some of the major issues of German domestic politics, economics, foreign policy, and culture by leading experts in their respective fields. This book serves primarily as a reference work on Germany for scholars and an interested public, but through this broader lens it also provides a magnifying glass of global developments which are challenging and transforming the modern state. The growing importance of Germany as a political actor and economic partner makes this endeavor all the more timely and pertinent from a German, European, and global perspective.

ASEAN and Power in International Relations

Far from displaying a uniform pattern of integration, the European Union varies significantly across policy areas, institutional development and individual countries. Why do some policies such as the Single Market attract non-EU member states, while some member states choose to opt out of other EU policies? In answering these questions, this innovative new text provides a state-of-the-art introduction to the study of European integration. The authors introduce the most important theories of European integration and apply these to the trajectories of key EU policy areas – including the single market, monetary policy, foreign and security policy, and justice and home affairs. Arguing that no single theory offers a completely convincing explanation of integration and differentiation in the EU, the authors put forward a new analytical perspective for describing and explaining the institutions and policies of the EU and their development over time. Written by a team of prominent scholars in the field, this thought-provoking book provides a new synthesis of integration theory and an original way of thinking about what the EU is and how it works.

The British National Bibliography

The debate over European integration is a central issue in the study of contemporary Europe. This book seeks to guide the student through the most important of the integration theories and academic literature on this vital topic. The reader starts with an expansive and wide ranging introductory essay which offers a clear overview and analysis of the shifting terms of the debate on European integration during the post-war period. Part two provides key extracts from the seminal authors who have contributed to and fashioned this debate throughout its duration. It brings together the most important parts from the most essential and influential literature on this important topic. This reader will be of value to the growing number of students, at both undergraduate and postgraduate level, who are undertaking courses in European studies and European politics. It will be especially useful to those who require some knowledge of the origins and developments of this important issue at the centre of the debate over Europe.
