It presents the origin and history of each of his writings as well as the intricacies of the poetry that has kept him alive on the modern literary scene. Mary Shelley edited this delicate commentary.

lled in the justness and extent of his observations on natural objects; he knew every plant by its name, and was familiar with the history and habits of every production of the earth; he could interpret without a fault each appearance in the sky; and the varied phenomena of heaven and earth filled him with deep emotion. He made his study and reading-room of the shadowed copse, the stream, the lake, and the waterfall. Ill health and continual pain preyed upon his powers; and the solitude in which we lived, particularly on our first arrival in Italy, although congenial to his feelings, must frequently have weighed upon his spirits; those beautiful and affecting "Lines written in Dejection near Naples" were composed at such an interval; but, when in health, his spirits were buoyant and youthful to an extraordinary degree.

The Complete Poetical Works of Percy Bysshe Shelley

Mary Wollstonecraft Shelley (1797-1851) was an English novelist who wrote the Gothic novel *Frankenstein; or, The Modern Prometheus* (1818), which is considered an early example of science fiction. She also edited and promoted the works of her husband, the Romantic poet and philosopher Percy Bysshe Shelley. Her father was the political philosopher William Godwin and her mother was the philosopher and feminist activist Mary Wollstonecraft. Shelley's mother died less than a month after giving birth to her. She was raised by her father who provided her with a rich if informal education, encouraging her to adhere to his own anarchist political theories. When she was four, her father married a neighbour with whom Shelley came to have a troubled relationship.

Delphi Complete Works of Edward Young (Illustrated)

The eighteenth century English poet, dramatist and philosopher, Edward Young is best remembered today for the enormously popular 'Night-Thoughts', a long, didactic poem contemplating the theme of death. The poem was inspired by the successive deaths of Young's stepdaughter, her husband and the poet's own wife over a five year period. Composed in blank-verse, it is a dramatic monologue of nearly 10,000 lines, divided into nine parts, or "Nights." Young's fame in Europe was further developed by his prose masterpiece, 'Conjectures on Original Composition', addressed to his friend, the novelist Samuel Richardson. The essay succinctly explores concepts that would later epitomise the principal concerns of the Romantic movement. The Delphi Poets Series offers readers the works of literature's finest poets, with superior formatting. For the first time in digital publishing, this volume presents Young's complete works, with related illustrations and the usual Delphi bonus material. While Donne was well educated and his poetic talents considerable he struggled for much of his life to provide for his family. The best of John Donne's poems John Donne (1572-1631) was born into a Catholic family and studied law before sailing with Essex to attack Cadiz in 1596. He was appointed secretary to Sir Thomas Egerton, the Lord Keeper (later Lord Chancellor), in 1598, but forfeited his worldly prospects when he secretly married Ann More, Lady Egerton's niece, in 1601; he was dismissed by Egerton and briefly imprisoned. [The Poetical Works Of Thomas Campbell](#)

Thomas Campbell: Ego, Paranormal Psi, My Big TOE - Thomas Campbell: Ego, Paranormal Psi, My Big TOE by Theories of Everything with Curt Jaimungal 103,698 views 3 years ago 3 hours, 15 minutes - Thomas Campbell, is the author of My Big TOE trilogy (MBT) which represents the results and conclusions of his scientific ...

Introduction

How did he come up with his Theory of Everything?

There's more to reality than what's operationally defined

Evidence involving remote viewing

Remote viewing vs Out of body experiences

Variables that affect Psi (paranormal) phenomenon

Writing the "My Big Theory of Everything" book (My Big TOE)

Brief overview of MBT (My Big TOE)

Overcoming the non-renormalizability of General Relativity (to merge with Quantum Field Theory)

Campbell's model is larger than just unifying the fundamental forces

Writing the book for the logical vs. intuitive types

Mathematics doesn't explain but describes

But what about Platonism?

Eric Weinstein and Stephen Wolfram (briefly mentioned)

Explaining the probabilistic nature of quantum mechanics

Donald Hoffman's views vs. Campbell's vs. The Matrix

The intellect vs. the intuitive part of you (which one to let go, if any, and how?)

Jung vs. Campbell

Curt's rant against "fear" / "ego" being the problem

Jordan Peterson vs. Campbell

Explications on fear

Is "your" consciousness separate from "you"?

Definitions of AUO and AUM (the foundational consciousness that preceded the universe)

Curt objects, mathematically, to the definition of entropy and other claims

We live in a "Virtual Reality"

What is "you"? What's identity? Are your body or mind?

Identity and death. What part of "you" survives after your body?

Relationship between consciousness and ego

Why follow our "intuition" when it's notoriously inaccurate?

Psychedelics are "real bad idea" for personal growth

Do psychedelics open the same doors as meditation?

The problem with our society is politeness (but how to raise children, if not to be polite?)

How can we have morality without an appeal to ego?

The place of science in the study of consciousness

Out of body experiences (specifics of Campbell's first journey)

Helping Curt with Transcendental Meditation

Non-dualism vs. Campbell (is truth subjective?)

Is the world determined? (asked by: G 007)

Why not start with "nothing" rather than consciousness? (asked by: Repair Man Scully)

How can you see aura's through photographs? Are they recorded in pixels?

Can we query NPMR and find out how to place second quantization / path integrals on rigorous foundations?
