Age of Extremes

An overview of the history of the twentieth century reviews the legacy of two world wars, the Depression, the end of colonialism, the Cold War, the collapse of the USSR, and the era's technological and scientific advances.

The Age of Extremes

Dividing the century into the Age of Catastrophe, 1914–1950, the Golden Age, 1950–1973, and the Landslide, 1973–1991, Hobsbawm marshals a vast array of data into a volume of unparalleled inclusiveness, vibrancy, and insight, a work that ranks with his classics *The Age of Empire* and *The Age of Revolution*. In the short century between 1914 and 1991, the world has been convulsed by two global wars that swept away millions of lives and entire systems of government. Communism became a messianic faith and then collapsed ignominiously. Peasants became city dwellers, housewives became workers—and, increasingly leaders. Populations became literate even as new technologies threatened to make print obsolete. And the driving forces of history swung from Europe to its former colonies. Includes 32 pages of photos.

The Age Of Extremes

THE AGE OF EXTREMES is eminent historian Eric Hobsbawm's personal vision of the twentieth century. Remarkable in its scope, and breathtaking in its depth of knowledge, this immensely rewarding book reviews the uniquely destructive and creative nature of the troubled twentieth century and makes challenging predictions for the future.

Industry and Empire

Premier historian Eric Hobsbawm's brilliant study of the Industrial Revolution, which sold more than a quarter of a million copies in its original edition, is now back in print, updated for a new generation. In *Industry and Empire*, Hobsbawm explores the origin and dramatic course of the Industrial Revolution over two hundred and fifty years and its influence on social and political institutions. He describes and accounts for Britain's rise as the first industrial power, its decline from domination, its special relation with the rest of the world, and the effects of this trajectory on the lives of its ordinary citizens. This new edition includes a fascinating summary of events of the last twenty years, and an illuminating new conclusion.

Age of Extremes

"Dividing the century into the Age of Catastrophe, 1914-1950, the Golden Age, 1950-1973, and the Landslide, 1973-1991, Hobsbawm marshals a vast array of data into a volume of ... inclusiveness, vibrancy, and insight, a work that ranks with his classics *The Age of Empire* and *The Age of Revolution*. In the short century between 1914 and 1991, the world has been convulsed by two global wars that swept away millions of lives and entire systems of government. Communism became a messianic faith and then collapsed ignominiously. Peasants became city dwellers, housewives became workers--and, increasingly leaders. Populations became literate even as new technologies threatened to make print obsolete. And the driving forces of history swung from Europe to its former colonies"--Publisher's description.

The New Century

Eric Hobsbawm's AGE OF EXTREMES was a remarkable phenomenon, a book of serious and challenging historical analysis that became a worldwide bestseller. Now, THE NEW CENTURY continues

Hobsbawm's analysis of our twentieth century, asking crucial questions about our inheritance from the century of conflict and its meanings for the years to come. Looking back over the last decade to learn something of the new era, Hobsbawm finds the distinction between internal and international conflicts and between state of war and state of peace disappearing. He goes on to analyse the crisis of the multi-ethnic state and shows the distortions of history involved in the creation of its myths. He expresses his anxiety over the system of international relations between states that have so far ruled by colonialism and nuclear terror. Hobsbawm then assesses the impact that a popular global culture has had on every aspect of life, from happiness and social hierarchy to nutrition and the environment. Published this year in dozens of countries throughout the world, *THE NEW CENTURY* is a concise summary of the thinking of one of the pre-eminent historians.

Interesting Times

Eric Hobsbawm is considered by many to be our greatest living historian. Robert Heilbroner, writing about Hobsbawm's *The Age of Extremes 1914-1991* said, "I know of no other account that sheds as much light on what is now behind us, and thereby casts so much illumination on our possible futures." Skeptical, endlessly curious, and almost contemporary with the terrible "short century" which is the subject of *Age of Extremes*, his most widely read book, Hobsbawm has, for eighty-five years, been committed to understanding the "interesting times" through which he has lived. Hitler came to power as Hobsbawm was on his way home from school in Berlin, and the Soviet Union fell while he was giving a seminar in New York. He was a member of the Apostles at King's College, Cambridge, took E.M. Forster to hear Lenny Bruce, and demonstrated with Bertrand Russell against nuclear arms in Trafalgar Square. He translated for Che Guevara in Havana, had Christmas dinner with a Soviet master spy in Budapest and an evening at home with Mahalia Jackson in Chicago. He saw the body of Stalin, started the modern history of banditry and is probably the only Marxist asked to collaborate with the inventor of the Mars bar. Hobsbawm takes us from Britain to the countries and cultures of Europe, to America (which he appreciated first through movies and jazz), to Latin America, Chile, India and the Far East. With *Interesting Times*, we see the history of the twentieth century through the unforgiving eye of one of its most intensely engaged participants, the incisiveness of whose views we cannot afford to ignore in a world in which history has come to be increasingly forgotten.

Fractured Times

Born almost a hundred years ago in Vienna - the cultural heart of a bourgeois Mitteleurope - Eric Hobsbawm, who was to become one of the most brilliant and original historians of our age, was uniquely placed to observe an era of titanic social and artistic change. As the century progressed, the forces of Communism and Dadaism, Ibiza and cyberspace, would do battle with the bourgeois high culture fin-de-siècle Vienna represented - the opera, the Burgtheater, the museums of art and science, City Hall. In *Fractured Times* Hobsbawm unpicks a century of cultural fragmentation and dissolution with characteristic verve and vigour. Hobsbawm examines the conditions that created the great cultural flowering of the belle époque and held the seeds of its disintegration, from paternalistic capitalism to globalisation and the arrival of a mass consumer society. Passionate but never sentimental, Hobsbawm ranges freely across his subject: he records the passing of the golden age of the 'free intellectual' and examines the lives of great, forgotten men; he analyses the relation between art and totalitarianism and dissects cultural phenomena as diverse as surrealism, women's emancipation and the American cowboy myth. Written with consummate imagination and skill, *Fractured Times* is the last book from one of our greatest modern-day thinkers.

On History

The theory and practice of history and its relevance to the modern world, by Britain's greatest radical historian.

Eric Hobsbawm: A Life in History

At the time of his death at the age of 95, Eric Hobsbawm (1917-2012) was the most famous historian in the world. His books were translated into more than fifty languages and he was as well known in Brazil and Italy as he was in Britain and the United States. His writings have had a huge and lasting effect on the practice of history. More than half a century after it appeared, his books remain a staple of university reading lists. He had an extraordinarily long life, with interests covering many countries and many cultures, ranging from poetry to jazz, literature to politics. He experienced life not only as a university

teacher but also as a young Communist in the Weimar Republic, a radical student at Cambridge, a political activist, an army conscript, a Soho 'man about town', a Hampstead intellectual, a Cambridge don, an influential journalist, a world traveller, and finally a Grand Old Man of Letters. In *A Life in History*, Richard Evans tells the story of Hobsbawm as an academic, but also as witness to history itself, and of the twentieth century's major political and intellectual currents. Eric not only wrote and spoke about many of the great issues of his time, but participated in many of them too, from Communist resistance to Hitler to revolution in Cuba, where he acted as an interpreter for Che Guevara. He was a prominent part of the Jazz scene in Soho in the late 1950s and his writings played a pivotal role in the emergence of New Labour in the late 1980s and early 1990s. This, the first biography of Eric Hobsbawm, is far more than a study of a professional historian. It is a study of an era.

Dark Continent

From award-winning historian Mark Mazower, *Dark Continent: Europe's Twentieth Century* retells the story of a century of division, charting the struggles of rival ideologies to create a new world order for mankind. The end of the First World War saw old empires swept away and the opportunity to build a better society from the ruins. Yet the result was division and bloodshed on an unprecedented scale, as liberal democracy, communism and fascism struggled against one another for mastery of the world. *Dark Continent* radically overturns the myth of Europe as a safe haven of democracy to redefine our view of the twentieth century. 'Original, thought-provoking, iconoclastic' Frank McLynn, *Irish Times* 'Fascinating and forceful' Martin Gilbert, *Literary Review* 'Mazower leaves us, in this wonderful book, with an account of our century that anyone who takes an interest in Europe's present and future will enlarge their mind by reading' John Keegan, *Daily Telegraph* 'There are few who can walk with A.J.P. Taylor. One is Mark Mazower ... a tour de force' Alex Danchev, *TLS* 'Combines narrative verve with wise and humane analysis. For anyone who wants to know how Europe came to be the way it is in the years since 1900, this is the work to provide the answers' David Cannadine, *Observer Books of the Year* Mark Mazower is the author of *Inside Hitler's Greece*, *The Balkans*, which won the Wolfson Prize for History, *Salonika: City of Ghosts*, which won both the Runciman Prize and the Duff Cooper Prize and *Hitler's Empire*.

On Nationalism

I remain in the curious position of disliking, distrusting, disapproving and fearing nationalism wherever it exists . . . but recognising its enormous force, which must be harnessed for progress if possible. In the last two decades the uses of the term 'nationalism' has increased steeply with the rising tide of nationalist parties. In this collection of historian Eric Hobsbawm's writing on nationalism, we see some of the critical historical insights he brings to bear on this contentious subject, which is more than ever relevant as we stand on the doorstep of an age when the internet and the globalisation of capital threaten to blow away many national boundaries while, as a reaction, nationalism seems to re-emerge with renewed strength. More than any other historian of our time, Hobsbawm took great care to seriously consider these movements, and never to decry nationalism and patriotism as simply absurd. The clarity of his insight is as vital today as it was in his lifetime: *On Nationalism* is an essential work for anyone who wants to understand the phenomenon.

Power and Resistance in the New World Order

In this fully revised and updated new edition, leading political scientist Stephen Gill further develops his radical theory of the new world order to argue that as the globalization of power intensifies, so too do globalized forms of resistance. Including two new chapters, this widely adopted text offers alternatives to the current world order.

Age of Extremes

"*On the Edge of the New Century*" is the sequel to Eric Hobsbawm's "*The Age of Extremes*"

On the Edge of the New Century

See:

The Age of Revolution: 1749-1848

This book provides a history of political ideologies during the period famously described by Eric Hobsbawm as "The Age of Extremes" -- from the First World War to the collapse of the Soviet Union. Ideologies in the Age of Extremes introduces the key ideologies of the age; liberalism, conservatism, communism, and fascism. Willie Thompson identifies the political influence of mass movements as a key feature. He uses a powerful approach that considers the different ideologies in relation to each other. This allows him to show that they often emerged from a common root or merged into a common future, stealing each other's clothes and reinventing themselves as the stark opposite of a competing ideology. This sophisticated yet accessible analysis will be of great interest to students of 20th century history and political theory.

Ideologies in the Age of Extremes

Few historians have done more to change the way we see the past than Eric Hobsbawm. From his early books on the Industrial Revolution and European empires, to his magnificent study of the "short twentieth century," *The Age of Extremes*, Hobsbawm has come to be known as one of the finest practitioners of his craft. Available now for the first time in an affordable paperback edition, *On History* brings together his most important essays on the study and practice of history. Ranging from early considerations of "history from below" and the "progress" of history, to recent debate on the relevance of studying the past, *On History* is an essential work from one of our preeminent thinkers.

On History

A fascinating collection of essays concerning working men and women. These 26 essays range over the history of working men and women between the late 18th century and the present day. They include Hobsbawm's pioneering studies in labour history and social protest - the formation of the British working class, labour custom and traditions, the political radicalism of 19th century shoemakers, male and female images in revolutionary movements, the machine-breakers, revolution and sex, peasants and politics, the rules of violence, the common-sense of Tom Paine. There are more recent reflections: on the May Day holiday; the Vietnam War; socialism and the avantgarde; Mario Puzo, the Mafia and the Sicilian bandit Salvatore Guiliano; and the cultural consequences of Christopher Columbus. There are tributes to some of jazz's legendary figures - Count Basie, Sidney Bechet and Dike Ellington - and the tragic blues-singer Billie Holiday.

Uncommon People

On Late Style was the final published work of Edward Said, author of *Orientalism* and one of the most important cultural critics of the post-war era. Said explores the works of artists in their twilight years and find that these works are often rebellious rather than conservative, prophetic not nostalgic and creatively restless far more than they are complacent. Deftly ranging across literature, music, art and film and the works of such artists as Euripides, Beethoven, Mozart, Genet and Mann, *On Late Style* is a dazzling display from one of the great critics of the 20th century. The book includes a foreword by Mariam C. Said and an introduction by Michael Wood.

On Late Style

A collection of essays which represent a lifetime's writing, lectures & thoughts on revolutionary modern political developments throughout Europe.

Revolutionaries

In the 144 years since Karl Marx's *Das Kapital* was published, the doctrine that bears his name has been embraced by millions in the name of equality, and just as dramatically has fallen from grace with the retreat of communism from the western world. But as the free market reaches its extreme limits in the economic and environmental fallout, a reassessment of capitalism's most vigorous and eloquent enemy has never been more timely. Eric Hobsbawm provides a fascinating and insightful overview of Marxism. He investigates its influences and analyses the spectacular reversal of Marxism's fortunes over the past thirty years.

How To Change The World

Eric Hobsbawm is considered by many to be our greatest living historian. Robert Heilbroner, writing about Hobsbawm's *The Age of Extremes* 1914-1991 said, "I know of no other account that sheds as

much light on what is now behind us, and thereby casts so much illumination on our possible futures." Skeptical, endlessly curious, and almost contemporary with the terrible "short century" which is the subject of *Age of Extremes*, his most widely read book, Hobsbawm has, for eighty-five years, been committed to understanding the "interesting times" through which he has lived. Hitler came to power as Hobsbawm was on his way home from school in Berlin, and the Soviet Union fell while he was giving a seminar in New York. He was a member of the Apostles at King's College, Cambridge, took E.M. Forster to hear Lenny Bruce, and demonstrated with Bertrand Russell against nuclear arms in Trafalgar Square. He translated for Che Guevara in Havana, had Christmas dinner with a Soviet master spy in Budapest and an evening at home with Mahalia Jackson in Chicago. He saw the body of Stalin, started the modern history of banditry and is probably the only Marxist asked to collaborate with the inventor of the Mars bar. Hobsbawm takes us from Britain to the countries and cultures of Europe, to America (which he appreciated first through movies and jazz), to Latin America, Chile, India and the Far East. With *Interesting Times*, we see the history of the twentieth century through the unforgiving eye of one of its most intensely engaged participants, the incisiveness of whose views we cannot afford to ignore in a world in which history has come to be increasingly forgotten.

Interesting Times

A trailblazing study of the social bandit or rebel **BANDITS** is a study of the social bandit or bandit-rebel - robbers and outlaws who are not regarded by public opinion as simple criminals, but rather as champions of social justice, as avengers or as primitive resistance fighters. Whether Balkan haiduks, Indian dacoits or Brazilian congaceiros, their spectacular exploits have been celebrated and preserved in story and myth. Some are only known to their fellow countrymen; others such as Rob Roy, Robin Hood and Jesse James are famous throughout the world. First published in 1969, **BANDITS** inspired a new field of historical study: bandit history.

Bandits

Eric Hobsbawm (1917-2012) wrote that Latin America was the only region of the world outside Europe which he felt he knew well and where he felt entirely at home. He claimed this was because it was the only part of the Third World whose two principal languages, Spanish and Portuguese, were within his reach. But he was also, of course, attracted by the potential for social revolution in Latin America. After the triumph of Fidel Castro in Cuba in January 1959, and even more after the defeat of the American attempt to overthrow him at the Bay of Pigs in April 1961, 'there was not an intellectual in Europe or the USA', he wrote, 'who was not under the spell of Latin America, a continent apparently bubbling with the lava of social revolutions'. 'The Third World brought the hope of revolution back to the First in the 1960s'. The two great international inspirations were Cuba and Vietnam, 'triumphs not only of revolution, but of Davids against Goliaths, of the weak against the all-powerful'.

Viva la Revolucion

The sequel to *The Age of Extremes* by "the best-known living historian in the world" (*The Times*, London). Eric Hobsbawm's *The Age of Extremes* was a remarkable phenomenon, a book of serious and challenging historical analysis that became a worldwide bestseller. Now, *On the Edge of the New Century* continues Hobsbawm's "magisterial" (*The New York Times Book Review*) analysis of the twentieth century, asking crucial questions about our inheritance from the century of conflict and its meanings for the years to come. Looking back over the last decade, Hobsbawm finds the distinctions between internal and international conflicts and between the state of war and the state of peace disappearing. He goes on to analyze the crisis of the multi-ethnic state and shows the distortions of history involved in the creation of its myths. He expresses his anxiety over the system of international relations between states that have so far ruled by colonialism and nuclear terror. Hobsbawm then assesses the impact that a popular global culture has had on every aspect of life, from happiness and social hierarchy to nutrition and the environment. Published this year throughout the world, *On the Edge of the New Century* is a concise summary of the thinking of one of the century's preeminent historians.

On the Edge of the New Century

In this book, Eric Hobsbawm chronicles the events and trends that led to the triumph of private enterprise and its exponents in the years between 1848 and 1875. Along with Hobsbawm's other volumes, this book constitutes an intellectual key to the origins of the world in which we now live. Although it pulses with great events—failed revolutions, catastrophic wars, and a global depression—*The Age of*

Capital is most outstanding for its analysis of the trends that created the new order. With the sweep and sophistication that have made him one of our greatest historians, Hobsbawm identifies this epoch's winners and losers, its institutions, ideologies, science, and religion.

The Age of Capital

This is an outstanding compendium of facts and figures on World History. Fully up-to-date, reliable and clear, this volume is the indispensable and user-friendly source of information on a thorough range of topics

The Routledge Companion to World History Since 1914

Recent years have seen a remarkable growth of interest in revolution and social upheaval. This collection of essays by distinguished historian and long-standing Marxist Eric Hobsbawm is a commentary and critical retrospective on the revolutionary movements and ideas that dominated the twentieth century, and which remain of crucial contemporary relevance. The essays here explore a broad range of related topics including the history of communism, the influence of marxism, insurrection, military coups and guerrilla warfare, and the role of intellectuals. This updated edition presents new thoughts on anti-communist polemics and the Spanish Civil War. Written with clarity and masterly assurance, Eric Hobsbawm's essays are indispensable for a true understanding both of twentieth-century history and of the pattern of events today.

Revolutionaries

At the turn of the 21st Century, the world was immediately gripped by the War on Terrorism followed by the Iraq War. In reflection, the 20th Century was a period marked by tremendous technological and economic progress — but it was also the most violent century in human history. It witnessed two horrendous world wars, as well as the conflicts during the Cold War. Why do wars persistently erupt among nations, particularly the Great Powers? What are the primary factors that drive nations to violence — power, prestige, ideology or territory? Or is it motivated by pure fear and mistrust? Peering nervously at the 21st Century, we wonder whether American supremacy and globalization will help ensure peace and stability. Or will shifts in power with the emergence of new economic super-nations lead to further tensions and conflicts in this century? Together with 29 Nobel laureates, an outstanding group of scholars gathered in Oslo, Norway, on December 6, 2001, for the three-day Nobel Centennial Symposium to discuss “The Conflicts of the 20th Century and the Solutions for the 21st Century”. Read this book for the scholars' candid insights and analyses, as well as their thought-provoking views on the factors that led to conflicts in the 20th Century and whether the 21st Century will be a more peaceful one. This is a rare — and possibly the best and only — book compilation of the highly intellectual analyses by world experts and Nobel Peace laureates on the perennial issues of War & Peace. Contents: Introduction: The Conflicts of the 20th Century and the Solutions for the 21st Century, Geir Lundestad & Olav Njølstad, The Norwegian Nobel Institute Dialogue and Cooperation to Achieve World Peace, Dae-Jung Kim, ex-President, The Republic of Korea War and Peace in the 20th Century, Eric Hobsbawm, Birkbeck College, University of London Ideologies and Politics: Liberal Democracy and National Dictatorship in Peace and, War Michael W Doyle, Princeton University Making Sense of Political Violence in Postcolonial Africa, Mahmood Mamdani, Columbia University Global Inequality and Persistent Conflicts, Amartya Sen, University of Cambridge (UK), and the 1998 Nobel Prize winner in Economic Sciences The Rise and Fall of Great Powers, Joseph S Nye, Harvard University Beyond Militarism, Arms Races and Arms Control, Mary H Kaldor, London School of Economics Rivalry over Territory and Resources and the Balance of Peace and War: The 20th Century, Louise Fawcett, St Catherine's College, Oxford University Misperception, Mistrust, Fear, Akira Iriye, Harvard University The Nobel Peace Prize in Its Next Century: Old and New Dimensions, Geir Lundestad, The Norwegian Nobel Institute Readership: Students, researchers, academics, politicians, journalists, and anyone interested in 20th century history and peace and conflict studies. Keywords: War; Peace; 20th Century; Conflicts and Solutions Nobel Symposium Reviews: “This beautifully produced and edited volume presents a fascinating collection of essays structured around the objectives engendered by the awarding of the Nobel Peace Prize ... this ensemble of contributions provides an excellent insight into the evolution of thinking about war and peace. As a reflection upon these crucial issues, it is readable, informative and highly recommended.” Journal of Peace Research

War and Peace in the 20th Century and Beyond

Sir Your name is down amongst the Black hearts in the Black Book and this is to advise you and the like of you, who are Parson Justasses, to make your wills Ye have been the Blackguard Enemies of the People on all occasions, Ye have not yet done as ye ought - Swing In our increasingly mechanized age, the Swing revolts are a timely record of the relationship between technological advance, labour and poverty. With the onset of the Industrial Revolution, capitalism swept from the cities into the countryside, and tensions mounted between agricultural workers and employers. From 1830 on, a series of revolts, known as the "Swing" shook England to its core. Landowners wanting to make their land more profitable started to use machinery to harvest crops, causing widespread misery among rural communities. Captain Swing reveals the background to that upheaval, from its rise to its fall, and shines a light on the people who tried to change the world and save their livelihoods.

Captain Swing

Erica Hobsbawm discusses the evolution of European economics, politics, arts, sciences, and cultural life from the height of the industrial revolution to the First World War. Hobsbawm combines vast erudition with a graceful prose style to re-create the epoch that laid the basis for the twentieth century.

The Age of Empire

A Braudel for the modern world--a masterful recreation of the years that formed our century--by England's leading social historian. 50 black-and-white photographs in three inserts.

The Age of Empire, 1875-1914

This is the disturbing central conclusion of Eric Hobsbawm's analysis of recent working-class history. The present volume brings together trade-union leaders and Labour MPs, socialist writers and work-place militants to debate Hobsbawm's assessment and to explore the situation and prospects of the labour movement. So broad a range of contributors has rarely been assembled for a discussion of this kind. Their essays are remarkable for their candour and clarity, and also for the freedom with which they cross the barriers that too often separate political from industrial issues, and academic research from the many questions raised by practical struggles. Nothing more clearly reveals the depth of Britain's crisis than the strategic and organizational controversies that currently divide the political and the trade-union wings of the labour movement. *The Forward March of Labour Halted?* will have an immediate impact, both inside the movement and on a wider public. -- from back cover.

The Forward March of Labour Halted?

'An Age of Progress?' is an advanced examination of major twentieth-century global developments regarding subjects as diverse as violence, capitalism, socialism and communism, imperialism, racism, nationalism, westernization, globalization, international finance, freedom and human rights, physical and mental environmental changes, culture, science, education, religion and social criticism. This momentous study also explores the ways in which the twentieth century made significant progress -- and the ways in which it did not.

An Age of Progress?

One of Germany's leading historians presents an ambitious and masterful account of the years encompassing the two world wars. Characterized by global war, political revolution and national crises, the period between 1914 and 1945 was one of the most horrifying eras in the history of the West. A noted scholar of modern German history, Heinrich August Winkler examines how and why Germany so radically broke with the normative project of the West and unleashed devastation across the world. In this total history of the thirty years between the start of World War One and the dropping of atomic bombs on Hiroshima and Nagasaki, Winkler blends historical narrative with political analysis and encompasses military strategy, national identity, class conflict, economic development and cultural change. The book includes astutely observed chapters on the United States, Japan, Russia, Britain, and the other European powers, and Winkler's distinctly European perspective offers insights beyond the accounts written by his British and American counterparts. As Germany takes its place at the helm of a unified Europe, Winkler's fascinating account will be widely read and debated for years to come.

The Age of Catastrophe

In these four incisive and keenly perceptive essays, one of our most celebrated and respected historians of modern Europe looks at the world situation and some of the major political problems confronting us at the start of the third millennium. With his usual measured and brilliant historical perspective, Eric Hobsbawm traces the rise of American hegemony in the twenty-first century. He examines the state of steadily increasing world disorder in the context of rapidly growing inequalities created by rampant free-market globalization. He makes clear that there is no longer a plural power system of states whose relations are governed by common laws--including those for the conduct of war. He scrutinizes America's policies, particularly its use of the threat of terrorism as an excuse for unilateral deployment of its global power. Finally, he discusses the ways in which the current American hegemony differs from the defunct British Empire in its inception, its ideology, and its effects on nations and individuals. Hobsbawm is particularly astute in assessing the United States' assertion of world hegemony, its denunciation of formerly accepted international conventions, and its launching of wars of aggression when it sees fit. Aside from the naivete and failure that have surrounded most of these imperial campaigns, Hobsbawm points out that foreign values and institutions--including those associated with a democratic government--can rarely be imposed on countries such as Iraq by outside forces unless the conditions exist that make them acceptable and readily adaptable. Timely and accessible, *On Empire* is a commanding work of history that should be read by anyone who wants some understanding of the turbulent times in which we live.

On Empire

A magisterial account of the rise of capitalism Eric Hobsbawm's magnificent treatment of the crucial years 1848-1875 is a penetrating analysis of the rise of capitalism and the consolidation of bourgeois culture. In the 1860s a new word entered the economic and political vocabulary of the world: 'capitalism'. The global triumph of capitalism is the major theme of history in the decades after 1848. The extension of capitalist economy to four corners of the globe, the mounting concentration of wealth, the migration of men, the domination of Europe and European culture made the third quarter of the nineteenth century a watershed. This is a history not only of Europe but of the world. Eric Hobsbawm's intention is not to summarise facts, but to draw facts together into a historical synthesis, to 'make sense of' the period, and to trace the roots of the present world back to it. He integrates economics with political and intellectual developments in this objective yet original account of revolution and the failure of revolution, of the cycles of boom and slump that characterise capitalist economies, of the victims and victors of the bourgeois ethos.

Age Of Capital: 1848-1875

'The Morbid Age' opens a window onto this creative but anxious era, the golden age of the public intellectual and scientist: Arnold Toynbee, Aldous and Julian Huxley, H.G. Wells, Marie Stopes and a host of others.

The Morbid Age

In this collection of essays, Washington Times columnist Francis argues that the 1992 victory of the Democratic Party in the presidential campaign marks not only the end of the Reagan-Bush era but the failure of American conservatism. He asserts that the changes of the last decade have led to a virtual disappearance of the political Right, and that for the first time since the New Deal, the nation faces the prospect of political democracy without an oppositional force to liberalism.
