The Development of Unmanned Aerial Conflict will examine the development and use of aerial drones, a topical subject that has not been written on to date. An unmanned aerial vehicle, commonly known as a drone, is an aircraft without a human pilot on board. Its flight is either controlled autonomously by computers in the vehicle, or under the remote control of a navigator or pilot on the ground or in another vehicle. Blending history with current and recent operations, Dr Sloggett will set out to put the record straight. In some quarters of the press drones get a bad press and there has been much controversy over their deployment, some of which is not deserved. The book reveals the history of unmanned aircraft, their recent development and why they have emerged onto the scene. Why did the US, for example, really invest highly in drone technology? When did all that start? What barriers had to be overcome? What was there before drones arrived? The book also analyses their operations in Iraq in Gulf War Two and more recently Afghanistan. What roles did drones play? Where they successful? What new developments emerged during operations? Did they save lives? Further to this is a detailed look at case studies where they have been used trying to remove some of the incorrect reporting – putting the record straight based on evidence. How many have been shot down and where? The book then looks at strategic uses of drones at present: Iran is being monitored; they are already in action over parts of Africa; what are other countries doing – China, Iran? Turkey? The RAF's use of drones, their deployment and operations is considered along with important questions such as where this goes for the future. What are the issues? Will all air forces be drone based in the future? What other applications may arise in the civilian market?

Drone Warfare

From drones the size of a fingertip to drones that can carry soldiers, from rotorcraft to submersible drones, this book expertly examines these complex autonomous vehicles.

Drones

From the producer and author of THE BLUE PLANET, this is the ultimate portrait of our planet; the perfect companion piece to a truly landmark television event. Prepare yourself for a spectacular tour of the world's many habitats, each possessing their own unique mood. From the claustrophobic darkness of the deep ocean, to the big skies of the open plains; the merciless, ever-expanding deserts to the diminishing jungles, teeming with violent life. The thread that binds them all is water - the precious element that has carved our world and which makes all life possible. Discover hidden life - animals that have yet to be extensively filmed, either through the inaccessibility of their habitat or their own elusive behaviour. Witness mass migration spectacles, bioluminescent corals and rarely seen mountain cats, all beautifully captured by the world's best nature photographers.

Planet Earth

This book explains a series of air-flow, performance, handling qualities and aircraft load problems and discusses the effects of these problems on flight safety. To meet this purpose, the book has been divided into the following main sections: the accidents; the aerodynamic problem areas; aircraft data reliability; the operation problems; and remarks on accident prevention and investigation.

Flight Safety Aerodynamics

En nostalgisk beskrivelse af begivenheder og højdepunkter i flyvningens historie.

Plane Speaking

An introduction to all aspects of radio-controlled model aircraft, this book provides information to enable the reader to choose the type of model he is most interested in. It includes advice on building models, equipment installation, varieties of engine and operational techniques.

Introducing Radio Control Model Aircraft

This book surveys all the Soviet/Russian aircraft that either remained "paper projects" (the work progressed no further than the design documents or even merely a design proposal) or were abandoned at the prototype construction stage. Over many years, the authors have unearthed a mass of unpublished material on these aircraft projects including the Isayev/Shevchenko bi-monoplane fighters with retractable lower wings developed in the 1930s, early Soviet jet fighter projects of the Second World War period, and the twin-boom fighters and attack aircraft developed by Semyon M. Alekseyev in the late 1940s. Wherever possible, images of the aircraft are shown, including pictures of models, and line and cutaway drawings from the project documents, giving the readers the maximum available information on Soviet aircraft projects developed over a large time scale. The book is richly illustrated with numerous photos, drawings, and diagrams, as well as color side views of the unbuilt aircraft, which will be of interest not only to the numerous Soviet/Russian aviation enthusiasts but also to scale modelers.

Unflown Wings

By the end of the Second World War the USA and Great Britain had developed viable jet fighters, even if these aircraft came a bit too late to have a significant impact on the course of the conflict. Germany achieved greater success, using the Me 262 and He 162 jet fighters operationally in the closing stages of the war. In contrast, the Soviet Union lagged behind, even though research on turbojet engines had begun in the USSR in the late 1930s. This deficiency was recognized and at the end of the war, captured German jet aircraft and engines enabled the USSR to reverse-engineer the technology. Even so, the USSR struggled to catch up until in 1946, the British Labor government gifted the Soviets the latest in propulsion technology, the Rolls-Royce Nene and Derwent V engines. This inexplicable action allowed a much more capable generation of Soviet jet fighters to be born and by the end of the 1940s Soviet industry had caught up with, and in some respects surpassed the West, in jet aviation. Because of the Stalinist era in which the first Soviet jets were developed, up until now little has been known about the

early post-war designs from the design bureaus of Mikoyan, Yakovlev, Lavochkin, Sukhoi and Alekseyev and the background to even relatively well-known types such as the MiG-9, La-9 and YAK-15 is barely documented. Other early jet types, proposals and projects were virtually unknown in the West. This gap is now redressed by the famous Soviet aviation historian Yefim Gordon and in his latest work he draws on extensive research in design bureau files, official documents and military archives, many of which have only very recently become available, having been labelled 'Top Secret' for decades. This volume presents, in considerable detail, the development, history and technical specifications of the earliest Soviet jet fighters and the extensive illustrations-around 750 photos, over 50 specially-commissioned color drawings and a host of line drawings--are mostly from previously classified sources the majority of which are previously unseen. This book is certain to be essential reading for aviation historians, enthusiasts and modelers.

Early Soviet Jet Fighters

Fully authorised and supported by Heathrow, the Haynes Heathrow Airport Manual takes the reader behind the scenes of the world's busiest airport, investigating all aspects of its organization. The author covers airport management, runways, terminals, air traffic control and airport operations, including fuelling, baggage services, freight, passenger services, retail, engineering, emergency services, ground transportation systems, security, meteorology, simulator training and telecommunications. This is a fascinating subject, ripe for the Haynes Manual treatment.

Heathrow Airport

Build Your Own Drone Manual provides practical advice and step-by-step procedures to enable the reader to build a basic, affordable, DIY drone. Suggested designs for two drones will included - both fixed wing and multiple-rotary wing.

Build Your Own Drone Manual

This addition to the Michelin Green Guide series provides travellers with a comprehensive guide to the cultural and natural highlights of Paris. The guide also includes hotel and restaurant selections.

Privatization

It's a vanished world, and Peter Hujar was right there in it. The Lower East Side between 1972 and 1985 - filled with artists, wannabe artists and hangers-on - was a community of the misbegotten gathered from every town in America and relocated in the mean streets between Broadway and the Bowery. Nothing but their talent, their flamboyance, their rank gender-bending mockery and their arch irony supported them. Some made their names. Many came to grief. A few made art. In those days, the gutted streets of the Lower East Side looked like a war zone. Everyone lived and worked on the extreme outer margins of money and art, penniless and unknown. As a community, Downtown was a counterstatement to the rich New York of the banks, museums, media, corporations ... and the art world itself. That Downtown is forever gone. Time, gentrification, disease and death have taken their toll and turned this vibrant epoch into a chapter of art history. But before it vanished, its extravagant cast sat for Peter Hujar's camera - and is now alive again in front of our eyes. Featured among others: Joe Brainard, William Burroughs, Remy Charlip, Edwin Denby, Divine, Ray Johnson, Fran Lebowitz, Charles Ludlum, Susan Sontag, Paul Thek, John Waters, Robert Wilson, David Wojnarowicz.

Trichier

'I often get asked, 'Who was your favorite person to photograph?' or 'Who is the best person you've photographed?' says photographer Perou. 'It's always 'Marilyn Manson.' Which is just as well, considering how many times I've photographed him.' Perou has been photographing Marilyn Manson since a 1998 magazine cover shoot. Twenty-one years of collaborating have resulted in this unique book, featuring over 350 photographs including previously unpublished work, conceptual portraits, onstage and informal behind-the-scenes images, giving a rare insight into Manson's world.

Opera's First Master

The 2019 reference for the interpretation and application of the latest international standards Wiley IFRS® Standards 2019 is a revised and comprehensive resource that includes the information needed to interpret and apply the most recent International Financial Reporting Standards (IFRS®) as outlined by the International Accounting Standards Board (IASB). This accessible resource contains a wide range of practical examples as well as invaluable guidance on the expanding framework for unified financial reporting. The authors provide IFRIC interpretations and directions designed to ensure a clear understanding of the most recent standards. The IFRS® standards are ever evolving, therefore it is essential that professionals and students have the information needed to apply the standards correctly in real-world cases. Wiley IFRS® Standards 2019 offers a complete, up-to-date reference that aids in the application of the latest international standards in a manner that is transparent, accountable and efficient. This edition includes IFRS 9 Financial Instruments; IFRS 15 Revenue from Contracts with Customers; IFRS 16 Leases and amendments issued and effective for annual periods beginning on or after 01 January 2018 and 01 January 2019 as issued by the IASB by 30 June 2018. This edition also includes some introductory guidance for IFRS 17 Insurance Contracts and incorporates the revised Conceptual Framework for Financial Reporting 2018. This important guide is written by the people passionate about IFRS® at PKF International. PKF International consists of over 400 offices, operating in 150 countries across five regions. PKF International specialises in providing high quality audit, accounting, tax, and business advisory solutions to international and domestic organisations around the globe. PKF International is a global family of legally independent firms bound together by a shared commitment to quality, integrity and the creation of clarity in a complex regulatory environment. PKF International is a member of the Forum of Firms – an organisation dedicated to consistent

and high-quality standards of financial reporting and auditing practices worldwide. www.pkf.com. PKF International Limited administers a family of legally independent firms and does not accept any responsibility or liability for the actions or inactions of any individual member or correspondent firm or firms. All rights reserved.

Little Polar Bear and the Husky Pup

The return of the famous shared-world superhero books created and edited by George R. R. Martin, author of *A GAME OF THRONES* When an alien virus struck the Earth decades ago, it spawned a new breed of superhuman men and women. Those with useful mutations were known as Aces, those with deformities as Jokers. Now, in New York's Jokertown, a savage street war has broken out between the Mafia and a gang known as the Shadow Fists. A courageous band of Aces must go underground to wage a war against the powers of the criminal netherworld. Edited by George R.R. Martin and including a story by him, this volume also features stories from Roger Zelazny, Pat Cadigan, Melinda M. Snodgrass and many more.

Then Come Back

The beginning of the End! Creatures from the hovering flying saucer (you'd better check out issue #1 to see where this started!) begin to break up the God Mountain. If they free the dreaming creature inside, the world will be destroyed! Jana and her friends have to fight their way through the Dirt People and past one of their hated and feared Dream Walkers to get to the caverns that holds a piece of an ancient weapon-one that might be able to stop the Aliens from achieving their goal. There's only one problem-to get the item they need, Jana will have to fight giant blood worms, Gigantopithicenes, and the Dream Walker himself!

Wiley Interpretation and Application of IFRS Standards

Drawing on the diverse efforts of scholars, dealers, and collectors, Galassi establishes here for the first time the coherence and significance of early outdoor painting in Italy. Building on this foundation, he explores in depth Corot's magnificent landscapes.

Volcanoes of the World

Adopting a multi-disciplinary and comparative approach, this book focuses on emerging and innovative attempts to tackle privacy and legal issues in cloud computing, such as personal data privacy, security and intellectual property protection. Leading i

Wild Cards: Down and Dirty

This illustrated encyclopedia to acoustic guitars demonstrates their elegant beauty and which famous musicians favored which brands throughout the years.

Jungle Girl Season 3 #2

First published in 2005. A cookery book by the author of *The Three Musketeers* and *The Count of Monte Cristo* may seem an improbability. Yet Alexandre Dumas was an expert cook- his love of food was said to be equalled only by his love of women - and his *Great Dictionary of Cuisine*, written to be read by worldly people and used by professionals and published posthumously in 1873, it is a masterpiece in its own right. This abridged version of the Dictionary is designed to be both useful and entertaining. A glance at the Index will show that there are hundreds of recipes - for sauces, soups, meat, fish, eggs, poultry and game - not all kitchen-tested with modern ingredients, but well within the scope of an experienced and imaginative cook.

Corot in Italy

The operatic tenor Luciano Pavarotti has attained the kind of superstardom usually only reached by film and pop stars. He is the most celebrated tenor today, his concerts attended by thousands, his records selling millions. This autobiography is a candid portrait of this extraordinary artist, offering clues to his character and to his ability to move millions of people by the power of his voice and personality.

Privacy and Legal Issues in Cloud Computing

Featuring over 400 full-color surgical photographs and drawings, this text/atlas is a step-by-step guide to the surgical approaches used to expose the facial skeleton. The authors describe in detail the key anatomic structures and the technical aspects of each approach, so that the surgeon can safely gain access to the region of the craniofacial skeleton requiring surgery. This Second Edition includes full-color intraoperative photographs that complement the surgical drawings. Several new approaches have been added—the transconjunctival approach to the medial orbit, subtarsal approach to the internal orbit, Weber-Ferguson approach to the midface, and facial degloving approach to the midface.

Acoustic Guitars

Explores mythology and beliefs of pagan Celts from 600 B.C. to A.D. 400. Since they were non-literates there is no written record of their lives, beliefs or stories, but those written by others.

Alexander Dumas Dictionary Of Cuisine

Great coloring books!

Pavarotti

Caillou and Daddy play a fun letter game while they wait for their alphabet soup to cool down.

Surgical Approaches to the Facial Skeleton

"A new interpretation and translation of Fernando Pessoa's *The Anarchist Banker* in which the banker argues he is the only true anarchist."--

Celtic Myths

"Copiously illustrated with hundreds of paintings and drawings, including never-before-published New Yorker cover roughs, behind-the-scenes animation development artwork, and personal sketches, *A Sketchy Past* is the first comprehensive survey of De Sève's work"--Dust jacket.

Cabin Life Coloring Book

A French-English dictionary with French-Canadian terms and essential French vocabulary.

Caillou, My First ABC

An outstanding novel about a young Russian woman's life in exile after the Russian Revolution. The *Book of Happiness* is one of the outstanding novels the great Russian writer Nina Berberova wrote during the years she lived in Paris, and the most autobiographical. "All Berberova's characters live raw, unfurnished lives, in poverty, on the edge of cities, with little sense of belonging except in moments of epiphany to their time and in life itself" (The Observer). Such a character is Vera, the protagonist of *The Book of Happiness*. At the novel's opening, Vera is summoned to the scene of a suicide, that of her childhood companion, Sam Adler, whose family left Russia in the early days of the revolution and whom Vera has not seen in many years. His death reduces Vera to a flood of tears and memories of the times before Sam's departure, and thoughts about how her life has gone since her move to Paris where she lives tied to a brilliant but demanding invalid husband. Berberova spins the story with a wonderful unsentimental poignancy, making it a beautiful testament to the indestructibility of happiness.

The Anarchist Banker

In this classic fantasy novel a warrior sets out to win a deadly contest to rule a prehistoric empire—and take the hand of its beautiful priestess. The lost city of Opar was first introduced to readers in the Tarzan novels of Edgar Rice Burroughs. Hidden deep in Africa, it is a place shrouded in mystery and awash with incredible riches. In *Hadon of Ancient Opar*, Hugo and Nebula Award-winning author Philip José Farmer reimagines this forgotten land, revealing the heroes who lived in its prehistoric golden age . . . A poor young man of great ambition, Hadon leaves his village to enter the great games of Klakor—a bloody contest in which only the strongest and most cunning warrior will survive. He seeks the ultimate prize: to rule the Khokarsan Empire alongside the powerful High Priestess. But his quest for the throne leads him beyond the empire's edge, where he finds himself embroiled in civil war.

A Sketchy Past

'I should have written you after my first reading of *The Living Currency*; it was already breath-taking and I should have responded. After reading it a few more times, I know it is the best book of our times.' Letter to Pierre Klossowski from Michel Foucault, winter 1970. *Living Currency* is the first English translation of Klossowski's *La monnaie vivante*. It offers an analysis of economic production as a mechanism of psychic production of desires and is a key work from this often overlooked but wonderfully creative French thinker.

Dictionnaire Anglais-français

"All for one and one for all!" The young and headstrong D'Artagnan, having proven his bravery by dueling with each, becomes a friend of Athos, Porthos, and Aramis, members of the King's Musketeers. He is in love with Constance Bonancieux and, at her urging, he and his friends head for England to reclaim two diamond studs that the Queen has imprudently given to her lover, the Duke of Buckingham. Richelieu, the chief minister of King Louis XIII, will resort to anything - even murder - to stop the Musketeers from interfering with his plan to ruin Queen Anne's reputation, and her influence over the King. *The Three Musketeers* is one of the world's greatest adventure stories, and its heroes have become symbols of youth, daring, and friendship. Behind the flashing blades, Dumas explores the eternal conflict between good and evil. Includes unique beautiful vintage illustrations.

The Book of Happiness

THE DUKAN DIET is a unique 4-step programme, combining two steps to lose your unwanted weight and two steps to keep it off for good: Step 1: Attack. For 2-7 days eat as much as you want of 72 protein-rich foods. Step 2: Cruise. Continue eating the protein-rich foods with the addition of 28 vegetables. Step 3: Consolidation. Add fruit, bread, cheese and starchy foods, and 2 celebration meals a week, allowing 5 days for every pound lost. Step 4: Stabilisation. Eat what you like without regaining weight by following 3 simple rules, including the famous 'protein Thursdays'. Devised by Dr Pierre Dukan, a French medical doctor who has spent his career helping people to lose weight permanently, THE DUKAN DIET is the culmination of thirty-five years' clinical experience. Without any of the usual marketing hype, THE DUKAN DIET swept across France, championed by the people who had successfully lost weight following the diet. It is now estimated that the Dukan community numbers over 5 million people in France. Easy to follow with no calorie counting, THE DUKAN DIET offers clear simple guidelines, menu planners and delicious recipes for long term success. Beyond its immense success in France, THE DUKAN DIET has been adopted by 20 countries and translated into 10 languages. Many international observers agree that this is the method most likely to put a stop to the world's weight problems. For more information visit www.dukandiet.co.uk.

Hadon of Ancient Opar

Aimed at experienced application developers who have forged applications in Windows using Visual Basic, this book is dedicated to Business Objects with VB. It contains new VB6 IIS and DHTML apps, ADO2 techniques, MTS 2.0 and component-based application development in Visual Basic 6.

Living Currency

"You will never look at a beetle or a moth the same way again." --WIRED "Art meets science to dazzling effect." --The Guardian Microsculpture is a unique photographic study of insects in mind-blowing magnification that celebrates the wonders of nature and science. Levon Biss's photographs capture in breathtaking detail the beauty of the insect world and are printed in large-scale format to provide an unforgettable viewing experience. Each picture in Microsculpture is created from approximately 8,000 individual photographs. Segments of the specimen are lit and photographed separately using microscope lenses, then "stacked" to maintain sharp focus throughout. These images are then combined to create a single high-resolution file. From start to finish, each portrait takes approximately 4 weeks to create. The project has captured the attention of the world with features in WIRED and New Scientist. Microsculpture has been exhibited at the Oxford University Museum of Natural History and the Xposure 2016 International Photography Festival in Sharjah, U.A.E. It has been viewed by over half a million people so far and will be touring museums around the world from 2017 onward. The entomology collection has significant cultural and historical value, containing the world's oldest pinned insect specimen and many thousands of insects collected by pioneering Victorian explorers and biologists such as Charles Darwin and Alfred Russell Wallace

The Three Musketeers Part 1

"I come from Des Moines. Somebody had to." And, as soon as Bill Bryson was old enough, he left. Des Moines couldn't hold him, but it did lure him back. After ten years in England he returned to the land of his youth, and drove almost 14,000 miles in search of a mythical small town called Amalgam, the kind of smiling village where the movies from his youth were set. Instead he drove through a series of horrific burgs, which he renamed Smellville, Fartville, Coleslaw, Coma, and Doldrum. At best his search led him to Anywhere, USA, a lookalike strip of gas stations, motels and hamburger outlets populated by obese and slow-witted hicks with a partiality for synthetic fibres. He discovered a continent that was doubly lost: lost to itself because he found it blighted by greed, pollution, mobile homes and television; lost to him because he had become a foreigner in his own country.

The Dukan Diet

Continues the adventures of the Dark Elf hero, Drizt Do-Urden, and his companions.

VB 6.0 BUS OBJ,

When The Big Show was first published, paper rationing meant that the text had to be heavily cut. Now, for the first time, this international bestseller has been returned to its complete, and breathtaking, original state. Pierre Clostermann was a Free French fighter ace who flew with the RAF during the Second World War. Over the course of five years he engaged in hundreds of dog-fights, shot down scores of Luftwaffe planes, escorted American bombers on some of the most dangerous raids of the war, and watched many of his friends falling to their deaths in the skies over the Channel. The Big Show, his incredible account of the air war over Britain and France, has become one of the most famous memoirs of the Second World War. Now in its original state, it contains everything one could wish for in a war memoir: wonderfully observed descriptions of wartime Britain, frighteningly evocative stories of in-the-cockpit action, an amazing cast of characters, and all the drama and bravery of a man fighting a desperate war thousands of feet above the ground. An undeniable classic.

Microsculpture

The whole of the magnificent Riftwar Cycle by bestselling author Raymond E. Feist, master of magic and adventure, now available in ebook

The Lost Continent

NEW YORK TIMES BESTSELLER • From the bestselling author of V2 and Fatherland—a WWII-era spy thriller set against the backdrop of the fateful Munich Conference of September 1938. Now a Netflix film starring Jeremy Irons. With this electrifying novel about treason and conscience, loyalty and betrayal, "Harris has brought history to life with exceptional skill" (The Washington Post). Hugh Legat is a rising star of the British diplomatic service, serving at 10 Downing Street as a private secretary to the Prime Minister, Neville Chamberlain. Paul von Hartmann is on the staff of the German Foreign Office--and

secretly a member of the anti-Hitler resistance. The two men were friends at Oxford in the 1920s, but have not been in contact since. Now, when Hugh flies with Chamberlain from London to Munich, and Hartmann travels on Hitler's train overnight from Berlin, their paths are set on a disastrous collision course. And once again, Robert Harris gives us actual events of historical importance--here are Hitler, Chamberlain, Mussolini, Daladier--at the heart of an electrifying, unputdownable novel.

The Life of Benjamin Franklin

This remarkable and wide-ranging book is an inventory of symbols and the symbolic imagination. The editors and their fifteen contributors are drawn from a variety of scholarly backgrounds—including anthropology, ethnology, psychotherapy and art history. This diversity of approach is responsible for the book's unique character, a reflection of the multiplicity of symbols and signs and the phenomenal range of possible interpretations they offer. This book draws together folklore, literary and artistic sources, and focuses on the symbolic dimension of every colour, number, sound, gesture, expression or character trait that has benefitted from symbolic interpretation. The conscious and unconscious minds are explored, desire and dreams are treated alongside the known and the chronicled. Extraordinary in its range and eclecticism, this dictionary was originally published in French as the *Dictionnaire des Symboles*, and it is regarded as the standard work on the subject.

The Two Swords

The Big Show
