Dinosaur Babies

A scientific look at creationism from a former creationist According to a recent Gallup Poll, almost 40 percent of Americans believe that sometime in the last 10,000 years Earth and humankind were created in their present form--the rationale being that this is (presumably) the story told in the book of Genesis. Within that group, any threatening scientific evidence that suggests otherwise is rejected or, when possible, retrofitted into a creationist worldview. But can this uncomfortable blend of biblical literalism and pseudoscience hold up under scrutiny? Is it tenable to believe that the Grand Canyon was formed not millions of years ago by gradual erosion but merely thousands of years ago by the Great Flood? Were there really baby dinosaurs with Noah on his ark? Janet Kellogg Ray, a science educator who grew up a creationist, doesn't want other Christians to have to do the exhausting mental gymnastics she did earlier in her life. Working through the findings of a range of fields including geology, paleontology, and biology, she shows how a literal interpretation of the book of Genesis simply doesn't mesh with what we know to be reality. But as someone who remains a committed Christian, Ray also shows how an acceptance of the theory of evolution is not necessarily an acceptance of atheism, and how God can still be responsible for having created the world, even if it wasn't in a single, momentary, miraculous event.

Go Girl! the Black Woman's Book of Travel and Adventure

travel book by and for black women

Go-Go Girls of the Apocalypse

Mortimer Tate was a recently divorced insurance salesman when he holed up in a cave on top of a mountain in Tennessee and rode out the end of the world. Go-Go Girls of the Apocalypse begins nine years later, when he emerges into a bizarre landscape filled with hollow reminders of an America that no longer exists. The highways are lined with abandoned automobiles; electricity is generated by indentured servants pedaling stationary bicycles. What little civilization remains revolves around Joey Armageddon's Sassy A-Go-Go strip clubs, where the beer is cold, the lap dancers are hot, and the bouncers are armed with M16s. Accompanied by his cowboy sidekick Buffalo Bill, the gorgeous stripper Sheila, and the mountain man Ted, Mortimer journeys to the lost city of Atlanta -- and a showdown that might determine the fate of humanity.
