Cytoskeleton Part I - Cytoskeleton Part I by Biology Basics 4,506 views 3 years ago 37 minutes - Molecular, & **Cellular Biology**, Lecture Series; UNF Spring 2021.

Intro

CHAPTER CONTENTS

Cytoskeleton gives a cell its shape and allows the ce to organize its internal components and to move

Three types of protein filaments form the cytoskeleton

Intermediate Filaments have 4 major classes

Intermediate filaments are like ropes made of long twisted strands of protein

Intermediate filaments form a strong, durable network in the cytoplasm of the cell

The Nuclear Envelope Is Supported by a Meshwork Intermediate Filaments

Linker Proteins Connect Cytoskeletal Filaments and Bridge the Nuclear Envelope

Plectin aids in the bundling of intermediate filamen and links these filaments to other cytoskeletal protein networks

Microtubules usually grow out from an organizing center

Microtubules are hollow tubes made of globular tubulin subunits

Tubulin polymerizes from nucleation sites on a centrosome nucleating sites

Microtubules Display Dynamic instability

GTP hydrolysis controls the dynamic instability of microtubules

Microtubule Dynamics Can Be Modified by Drugs

Taxol is an antimetabolic that is commonly used in cancer treatment

MICROTUBULES SERVE MANY FUNCTIONS

Different motor proteins transport different types cargo along microtubules

Microtubules in a cilium or flagellum are arranged in

Get a pen and paper to write your answers. 2. You can also use the Notepad in your computer.

1. The four basic needs of living things are

The place where the animal naturally lives in is known as

What is the basic requirement of an organism to stay alive?

What do you call the reduction of activity by animals during summer?

Which of the following is a food chain?

Which level of biological organization includes all the others listed?

A chicken ate a worm that ate the leaves of a plant. A snake ate the chicken. What is the chicken called?

Organism keep their internal conditions relatively stable through

Which is NOT a fish?

A relationship where in both organisms benefit from each other is called

Which of the following animals is cold blooded?

The life cycle undergone by insects is called

When pollen grains are carried from anther to stigma of another flower, the process is called

The taxon that includes the other is

Which if the following source of energy is needed for photosynthesis?

What carries the oxygen-rich blood to the head, arms, and down to the legs?

What pigment gives the skin its natural color?

Who is the father of binomial nomenclature?

How many bones does a human adult have?

Which of the following animals feeds on necrotic and decaying matter?

Which molecule contains an organism's genetic makeup?

Single-celled organisms that lack membrane bound organelles are called

Prions that cause disease are made-up of

Which part of the respiratory tract is colloquially called windpipe?

The male primary reproductive organ is the

The asexual reproduction which occurs when a new organism develops from an outgrowth is called

Absorption of nutrients happen in the

Where does one experience the longest and coldest winters?

The growth of roots towards water is an example of

What is the smallest part of a living thing which performs all the processes a living organism does?

END OF PRACTICE EXAM What's your score? Please comment it below.

Tour Info 2024

Coming up

Intro

Why we focus on faith, family, and science

Acknowledging what we do, do not, and are not meant to know

When Jesus met the Pharisees, the central principle

We manifest proportional realities to fit our damaged personal truths

"My father never said he was proud of me"

Be who you are on purpose and live with intention

If you're an immature hedonist...

Negotiate toward everyone's best outcome

Consciously choose which voices in your life deserve attention

Who are you? Getting past the default answers

Why your sexual identity is not "who you are"

Base your secular thoughts on empirical fact

It's incredibly difficult to breach a well structured delusion

Why change is so hard: "after tyranny waits the desert"

The difference between questioning and deconstructing

We don't all use the same currency, Chris Voss and negotiation techniques

Bottom up learning, parenting, and relationships

We screwed up during the pandemic, "hell, Lassie could figure this one out"

Meritocracy vs. the fringe, the psychopathy of virtualization

The obvious contagion effect of transgenderism

It's more than just silence, the medical establishments complicit and lying

Governments are creating social contagions via progressive policies

Why are academics, doctors, and experts backing pseudo-science?

Dr. Phil is a danger to the mainstream narrative... good.

Balancing ego with purpose
