Which term defines the following: All body systems must be in a condition of balance for the body to survive and work properly.

Where is the ulna bone in relation to the metacarpals?

What one of the following is not a type of fat?

What cells in the body are responsible for waste removal?

Which of the following is the medical term for the knee?

How many layers is the skin composed of?

What is another term that describes the gene's genetic makeup?

Bile from the liver is stored and concentrated in what organ?

Which of the following organs is responsible for absorbing vitamin K from the digestive tract?

What term defines the mass-weighted average of the isotope masses that make up an element?

Somatic cells undergo which process to produce more

12 What is the pH of an acid?

What is the protective layer around nerves called?

Which part of the nervous system regulates voluntary actions?

Which of the following is NOT considered a mammal?

Which of the following bases is not found in DNA?

Which of the following is not an example of a polar bond?

Through the processes of photosynthesis and oxygen release, _____ provide energy that supports plant growth and crop output.

Which law describes the relationship between volume and temperature with constant pressure and volume?

What is the name of the muscle used to aid in respiration in humans?

Which of the following choices have an alkaline base?

Which of the following organs are NOT included in the thoracic cavity?

Which of the following infections is caused by a bacterium?

20 What is the name of the appendages that receive communication from other cells?

Carbohydrates are broken down in the digestive system. Where does this process begin?

20 Which of the following is NOT a function of the kidneys?

After blood leaves the right ventricle where does it travel to next?

A person has blood type O-. What blood type may this person receive blood from?

What is the name of the tissue that separates the lower ventricles of the heart?

What type of muscle is myocardium (heart muscle)?

What uses mechanisms that direct impulses toward a nerve cell's body?

Which of the following is NOT an action that the endocrine system is responsible for?

Which of the following is NOT part of the lymphatic system?

30 The atomic number is the same as?

Which term describes the destruction of red blood

30 Which of the following is NOT part of the appendicular skeleton?

39 The process of molecules from a solution containing a high concentration of water molecules to one containing a lower concentration through the partially permeable membrane of a cell.

40 What is the term for the tissue in which gas exchange takes place in the lungs?
