Never Touch a Spider!

A tactile touch-and-feel book full of funny bugs.

This Book Is Full Of Spiders: Seriously Dude Don't Touch It

Fan favourite David Wong takes readers to a whole new level with this blistering sequel to the cult sensation John Dies at the End, now a movie starring Paul Giamatti. As the sequel opens, we find our heroes, David and John, again embroiled in a series of horrifying yet mind-bogglingly ridiculous events caused primarily by their own gross incompetence. The guys find that books and movies about zombies may have triggered a zombie apocalypse, despite a complete lack of zombies in the world. As they race against the clock to protect humanity from its own paranoia, they must ask themselves, who are the real monsters? Actually, that would be the shape-shifting horrors secretly taking over the world behind the scenes that, in the end, make John and Dave kind of wish it had been zombies after all. Hilarious, terrifying, engaging and wrenching, This Book Is Full of Spiders, the next thrilling installment, takes us for a wild ride with two slackers from the midwest who really have better things to do with their time than prevent the apocalypse.

Never Touch a Dinosaur!

Join the playful dinosaurs in this exciting addition to our bestselling Never Touch series. The adorable mini format is perfect for on-the-go adventures. Not-So-Scary Hairy Spider

Spider wants to join the insects up the waterspout, but he is too hairy and scary! So his friend helps him try on different outfits to look less scary. Children will love interacting with the Spiders touch-and-feel costumes in this hilarious book.

This Book Is Full of Spiders

My name is David Wong. My best friend is John. Those names are fake. You might want to change yours. You may not want to know about the things you'll read on these pages, about the sauce, about Korrock, about the invasion, and the future. But it's too late. You touched the book. You're in the game. You're under the eye. The only defence is knowledge. You need to read this book, to the end. Even the part about the bratwurst. Why? You'll just have to trust me. Unfortunately for us, if you make the right choice, we'll have a much harder time explaining how to fight off the otherworldly invasion currently threatening to enslave humanity. I'm sorry to have involved you in this, I really am. But as you read about these terrible events and the very dark epoch the world is about to enter as a result, it is crucial you keep one thing in mind: NONE OF THIS IS MY FAULT...

John Dies at the End

"Little Miss Muffet is not the only one who's ever been terrified by a spider. In fact, arachnophobia, or the fear of spiders, afflicts millions around the world. Some people are so tormented that they cannot ever relax, even at home, for fear they'll encounter a "creepy crawler." And yet, a love of spiders -- or at least a fascination with them -- touches just as many millions, perhaps more. Though some spiders are dangerous, even deadly, most are perfectly harmless -- except to smaller bugs. In *The Book of the Spider*, naturalist Paul Hillyard examines the engaging world of arachnids and the humorous and frequently absurd ways in which humans respond to this most misunderstood of God's creatures. Hillyard, an arachnologist at the Natural History Museum in London, covers the full spider spectrum, from folklore and myths to Aristotle's early scientific studies to Space Age spiders building webs in outer space. There are more than 35,000 known spider species of all shapes and sizes on planet Earth, and Hillyard addresses a plethora of questions obvious and odd, obscure and intriguing: -- Why is black-widow venom more dangerous than a rattlesnake bite? -- How can humans forecast weather by observing a spider's actions? -- What's the best cooking method for spider a la carte? -- Why are spiderwebs often used to dress wounds and coagulate blood? -- How can spiders be beneficial in the cure of headaches, fevers, and even sexual impotence? In *The Book of the Spider* these and other questions are pondered and answered in a manner that no lover -- or detester -- of spiders will ever forget.

The Book of the Spider

Stink's spider phobia spurs his sister, Judy, and friend Webster to try some desensitization techniques—until a real-life encounter takes them by surprise—in a hilarious episode offering a bonus origami activity. Creepy! Crawly! Criminy! Everyone knows that Stink is bonkers about most scientific things. But there's one exception: dangle a spider in front of him and he goes berserk! Stink is so freaked out by spiders that he can't read about them. He can't look at them. He can't think about them. And he for-sure can't touch them! Stink has arachnophobia (a fear of spiders), and he has it bad. But when a hairy backyard emergency arises, Stink is forced to face his fear—and eight beady eyes—head-on. Will he manage to tame the heebie-jeebies, or will he remain stuck in his web of terror? Arachno-fans will love the comics sprinkled throughout with facts about spiders as well as a hands-on origami challenge.

Stink and the Hairy Scary Spider

Spiders

When a little girl finds a huntsman spider in her house, she finds a creative way to usher him outdoors without killing him.

A Huntsman Spider In My House

This basic introduction to spiders demonstrates their wide variety of colors and sizes, as well as the many different environments they live in. Be careful not to touch spiders! Just watch them closely as they spin silk to make webs, to protect their eggs, and to catch food. Copyright © Libri GmbH. All rights reserved.

Spiders

How do spiders spin webs? Who many different kinds of spiders are there in the world? How many eyes do spider have. To find the answers, read 'Find out about Spiders'. This book is part of the new 'Find Out About' series.

Find Out about Spiders

One day a spider appeared on the window ledge outside the glass. Right away she began to spin a web. Thus begins an inspiring true story—a story of an expectant mother who develops an unexpected relationship with the spider that makes a home outside her window. As the summer and the mother's pregnancy progress, the spider is beginning its own circle of life. From its first graceful web, to its creation of a delicate egg sac, the spider lives through the fall season, and what should be the end of its life. But by a small miracle of nature, the orb weaver endures the snow and the winter, and stays with her eggs until spring. This gentle story with strikingly detailed illustrations reveals the exceptional magic in the everyday world, and how it can touch our lives. The parallel stories of the human mother and the spider show how stopping to observe nature can allow you to witness everyday miracles. Additional in-depth information on spiders is included in an afterword.

Once I Knew a Spider

“Reluctant readers and fans of the Wimpy Kid series and its ilk will appreciate the book’s dynamic type, graphics galore, cartoonish illustrations, and ironic footnotes.”—Kirkus Don’t call him scaredy-cat Sam, because Sam Wu IS NOT AFRAID of ghosts! Except . . . he totally is. Can he conquer his fear by facing the ghost that lives in the walls of his house? After an unfortunate (and very embarrassing) incident in the Space Museum, Sam goes on a mission to prove to the school bully, and all his friends, that he’s not afraid of anything—just like the heroes on his favorite show, Space Blasters. And when it looks like his house is haunted, Sam gets the chance to prove how brave he can be. A funny, touching, and charming story of ghost hunting, escaped pet snakes, and cats with attitude!

Sam Wu Is Not Afraid of Ghosts

THERE are certain days of the year when the immense wealth of spider industry going on all around us is revealed in a way calculated to strike even the least observant. We all know—and derive no peculiarly pleasant thrill from the knowledge—that we can, if so minded, find abundance of cobwebs and their occupants by visiting the cellar or the tool-house; and probably we have all at times noticed, with a languid interest, large circular webs on our favourite rose-bushes, with a spider motionless in the centre. But some spring or autumn morning, when the night has been foggy and the sun has only just succeeded in dispersing the mists, every bush and hedge is seen to be draped, every square foot of lawn and meadow to be carpeted with spiders’ silk. There has been no special activity in the domain of these creatures, but every silken line is beaded with drops perhaps fifty times its diameter, and what yesterday required careful observation to detect is now visible yards away, and we realise for once something of the prodigious activity constantly going on though ordinarily unnoted. And it never entirely ceases. True hibernation, if it ever occurs, is not the rule among spiders, and there is no time of the year when some species may not be found at work. Beat trees or bushes over an old umbrella, or sweep grass and herbage with a sweeping net in summer, and you will never draw a blank—some spiders are sure to be found. In winter such measures are profitless, but if you take the trouble to grub among ground vegetation, or shake fallen leaves over a newspaper, or search under stones or logs of wood you will have no difficulty in finding spiders enough, and by no means dormant. I have even seen

an enthusiastic collector remove inches of snow and disinter rare species from among the roots of the grass beneath!

Britain's Spiders

The brown recluse is a fascinating spider very well adapted to dwelling in houses and other buildings. Because of this very quality and the ghastly reputation associated with the medical consequences of its bite, it has become infamous throughout North America. Although recluse spiders can cause serious skin injuries and, in very rare cases, death, the danger posed by this spider is often exaggerated as a result of arachnophobia and the misdiagnosis of non-spider-related conditions as brown recluse bites. These misdiagnoses often occur in areas of North America where the spider does not exist, making legitimate bites improbable. One of the greatest factors that keeps the myths alive is misidentification of common (and harmless) spiders as brown recluses. With this book, Richard S. Vetter hopes to educate readers regarding the biology of the spider and medical aspects of its bites, to reduce the incidence of misdiagnoses, and to quell misplaced anxiety. In The Brown Recluse Spider, Vetter covers topics such as taxonomy, identification, misidentification, life history characteristics and biology, medical aspects

of envenomations, medical conditions misdiagnosed as brown recluse bites, other spider species of medical consideration (several of which have been wrongly implicated as threats to human health), and the psychology behind the entrenched reasons why people believe so deeply in the presence of the spider in the face of strong, contradictory information. Vetter also makes recommendations for control of the spider for households in areas where the spiders are found and describes other species of recluse spiders in North America. Although *The Brown Recluse Spider* was written for a general audience, it is also a valuable source of information for arachnologists and medical personnel.

Touch and Feel Itsy Bitsy Spider

Offering helpful, humor-laced advice on how to avoid getting stung, bit, poked, jabbed, or poisoned--and what to do if it happens--this guide explains everything from rashes to anaphylaxis, tetanus to spider bites, and cat-scratch fever to rabies, all in kid-friendly language. A strong foundation in biology grounds the discussion, which explains how certain plants and animals can be dangerous and reveals medical information on the physical reactions they can produce. The topical trivia and goofy puns make learning fun both in the classroom and at home.

Along Came a Spider

There is a man who likes to play with magic. One day he comes across a wooden spider. Well, this spider has a curse on it. From that day on, anyone who comes in touch with it had the power to kill with it. Only the spider has powers that cannot be explained. One day, a young man takes the spider and makes replicas of it. That is where many problems start to begin. In a small town called Grudge is where most of the people are from. You can tell by the name of the town that it is nothing but trouble for the young man.

The Brown Recluse Spider

Spiders of the World explores the huge diversity of spider species and their fascinating traits, with profiles of 117 families accompanied by expert commentary and beautiful photographs.

Don't Touch That!

Bold and quirky, this imaginative adventure story is about a real insect: the red spider mite.

Wooden Spiders

An examination of metaphor in poetry as a microcosm of the human imagination—a way to understand the mechanisms of creativity. In *The Spider's Thread*, Keith Holyoak looks at metaphor as a microcosm of the creative imagination. Holyoak, a psychologist and poet, draws on the perspectives of thinkers from the humanities—poets, philosophers, and critics—and from the sciences—psychologists, neuroscientists, linguists, and computer scientists. He begins each chapter with a poem—by poets including Samuel Taylor Coleridge, Sylvia Plath, Walt Whitman, Emily Dickinson, Robert Frost, Theodore Roethke, Du Fu, William Butler Yeats, and Pablo Neruda—and then widens the discussion to broader notions of metaphor and mind. Holyoak uses Whitman's poem "A Noiseless Patient Spider" to illustrate the process of interpreting a poem, and explains the relevance of two psychological mechanisms, analogy and conceptual combination, to metaphor. He outlines ideas first sketched by Coleridge—who called poetry "the best words in their best order"—and links them to modern research on the interplay between cognition and emotion, controlled and associative thinking, memory and creativity. Building on Emily Dickinson's declaration "the brain is wider than the sky," Holyoak suggests that the control and default networks in the brain may combine to support creativity. He also considers, among other things, the interplay of sound and meaning in poetry; symbolism in the work of Yeats, Jung, and others; indirect communication in poems; the mixture of active and passive processes in creativity; and whether artificial intelligence could ever achieve poetic authenticity. Guided by Holyoak, we can begin to trace the outlines of creativity through the mechanisms of metaphor.

spiders

This is a book about spiders and arachnophobia. With a touch of humour, deep curiosity and an artist's eye the author examines her phobia and the object of her fear. What is a spider? What makes these eight-legged creatures so scary? To understand her own reactions to spiders better she describes her past and present encounters with them. The story takes her back to her childhood in Norway

and the USA, to holidays in Spain and Portugal, to travels around Australia, and to her relocation in Tasmania. She focuses on Australian spiders while including fine examples of these astonishing creatures from elsewhere. Hildegunn Hodne, originally from Norway, now calls Tasmania home. She works as a freelance illustrator, writer and portrait artist with studio space in the small village of Chudleigh, Northern Tasmania. To ensure she continues to encounter spiders and local wildlife she also works as a gardener. Spider Stories: My Journey from Phobia to Fascination is her first book. She's currently working on a new book project, focusing on birds and travels. For more examples of Hildegunn's artwork please visit her website: hildegunnhodne.com

Red Spider Hero

Compared to insects, fossil spiders have received only scant attention in the literature. Previously, the only works available were numerous scientific papers, many published in foreign languages. Most of these are basic descriptive taxonomic works, with very few considering broader biological concepts. Despite a significant increase in the discovery and description of fossil spiders within the last quarter Century this void remained unfilled. Thus, this short monograph aims to achieve several objectives. Firstly, to provide general and up to date background information on the overall importance and diversity of fossils spiders, including an indication of those groups for which the taxonomy is spurious and in need of reassessment. Secondly, to discuss the techniques available for working with fossil spiders and some of the problems encountered by palaeoarachnologists, including bias and limitations of the spider fossil record. Thirdly, the overall evolutionary history of spiders is summarized in the form of an evolutionary tree, which is subsequently used to address key issues of broad interest, such as origins, diversifications and extinctions, including the effects of mass extinctions and predator-prey co-radiations. Finally, the contribution that fossil data can make to understanding the past and present biogeography of the order is considered. This book should be of interest to both amateur and professional arachnologists and palaeontologists and will also serve as a general palaeontological reference work for neontologists studying extant spiders.

Spider Stories

Life is full of beginnings, of hope, adventure, family and love. This story takes us on a beautiful, often witty and heartwarming journey through life; living among wonderful people, breathtaking locations and often harsh reality. and discovery, in a life filled with love ...and hope.

The World of Spiders

Within the last few decades, arachnology in the Neotropical region has experienced a great development filling the knowledge gap in one of the most diverse regions of the world. Nevertheless, large geographical areas remain poorly sampled, especially within the Amazon, and new genera and species have been continuously discovered, even in urban areas. In congruence with the recent improvements in research, several aspects of the ecology, behaviour and natural history of spiders, such as interactions with other predators and parasitoids, social interactions, dispersal patterns, habitat requirements, mating behaviors, among others, are being carefully investigated. These recent contributions incorporate substantial information on the preexisting knowledge on these subjects every year. Our main objective with this book is to present a summary on these new researches and on the currently knowledge on the main subjects involved in the general theme, emphasizing the contribution of the rich fauna of the Neotropical region to the research of behaviour and ecology of the spiders.

The Private Life of Spiders

Life is about relationships, good and bad. Individualism may feel strong. In reality, it's much weaker than when we stand together. Much of the joy of life comes from the manner in which others touch our lives. Do you remember the last time someone touched your life with a word of encouragement? Your response may have been a smile or a sense of joy. Not all touches are like that. Some people touch

our lives with pain through hurtful comments, insinuation, or even lies. Solomon declared that life and death are in the power of the tongue. Our conversations are a key contributor to the effects we have on one another. This book is an invitation to explore the impact of others on us and our influence on them. It takes courage to nurture others and accept their nurturing. Communication coupled with action is the key to growth when we've experienced God as the source of our spiritual lives in Christ. "Glenn Taylor's writing on the subject of healthy relationships is the outcome [of] a lifelong commitment to living fully into all aspects of life. As a result, this book has deep roots and a solid foundation. I commend it to you."

—Dr. Rod Wilson, Vancouver, B.C. "There is no substitute for a firsthand witness. This is as true today as it was for the Resurrection. This book is the direct result of a truly empathetic faithful witness... This is a must read for anyone who is involved in ministry, counseling, or leadership of any kind."

—James Tughan, Canadian Artist, Oakville, Ontario "I believe the chapter on the importance of the community of faith as a place for receiving love, nurture, and healing meets a critical need in our disconnected society."

The Ghosts of Four Chimneys

When Captain Jason Lord is kidnapped and accused of endangering finances of Lord College, his daughter Hannah resolves to restore his good name and follow his dreams. Because of his OSS activities in WWII, agents from three countries pursue him. An earthquake uncovers ancient bones at Four Chimneys, the Lord estate. They may belong to Iroquois Indians, escaping slaves, or Viking explorers, all of whom had ties to the site. Their ghosts haunt Hannah, and their descendants claim the bones and the land. Someone also wants to destroy documents hidden in Four Chimneys. Adam Tom, Hannah's mentor of mixed ancestry (think Morgan Freeman), tries to protect her. A CIA agent falls in love with her and her first love wants her back. Hannah struggles against political forces churning in the Sixties. FOUR CHIMNEYS is destroyed, but not the passions which grow from it.

Poplar Forest is one of two personal residences that Thomas Jefferson designed for himself, the other being Monticello. Jefferson's wife, Martha Wayles Skelton Jefferson, inherited the land—originally a 6,861-acre parcel—at her father's death in 1773, but Jefferson did not begin construction on the house until 1806, and at his death in 1826, he was still working on his little "getaway." Despite its audacious design—it was the first documented octagonal residence in America—and the fact that it is one of the very few extant Jeffersonian structures, Poplar Forest is not nearly so well-known today as its sibling seventy miles to the northeast. Undoubtedly, this is due in large part to its more remote location in Bedford County. Additionally, the house remained in private hands until 1984. Travis McDonald situates the site in its rightful position as a historically important Virginia house, and he documents its story as central to Jefferson's life and approach to architecture, including details of the enslaved community at

his western retreat. This new, informed account will appeal to architectural historians and visitors to the villa retreat, as well as to those interested in Jefferson's work and legacy.

In the Ukraine, east of the Carpathian Mountains, there is an invisible city. Known as Czernowitz, the 'Vienna of the East' under the Habsburg empire, this Jewish-German Eastern European culture vanished after WWII - yet an idealized version lives on. This book chronicles the city's survival in personal, familial, and cultural memory.

The Nantucket Haunted Hike Presents: Haunted Nantucket Island Twenty-two True Nantucket Ghost Stories

Dan Chiponda earns a scholarship to study in China and reluctantly leaves his native Zimbabwe for an uncertain future. Learning to take racial abuse in his stride, he dates a fellow student, Lai Ying, who is attracted to his easy-going manner. He remains haunted by the weight of his mother's expectations, encapsulated by the image of the African fish eagle. Things take a dramatic turn when Chinese students pour into the streets in an orgy of violence to drive Africans out of town. The situation in Nanjing only stabilises when attention turns to the mayhem that is unraveling in Tiananmen Square, Beijing. But that is only the beginning of Dan's troubles with the 'Campus Gestapo', loan sharks in Hong Kong, and the shock of his family getting caught up in the violence by Mugabe's war vets. Black Ghosts was inspired by stories of Africans living in China in the 1980s and, in particular, by the little known incident in Nanjing, where African and Chinese students engaged each other in a violent battle just months before the Tiananmen Square massacre.

"To those who may be encountering Louisiana for the first time through these wonderful stories-prepare to be engaged and entertained to a degree to which you are certainly unaccustomed . . . Barbara's gift for storytelling holds in the written word just as it does before a television camera."-Phillip J. Jones, former secretary, Louisiana Department of Culture, Recreation, and Tourism "A personal, anecdotal narrative that paints events with evocative descriptions . . . best savored in slices-it serves up a great bedtime read."-New Orleans Times-Picayune Based on the PBS documentary of the same name that aired across the country, The Haunting of Louisiana highlights many of the stories that would not fit into the one-hour television program. Louisiana's haunted reputation is spotlighted in the twenty chapters that cover the ghostly escapades and happenings at Oak Alley Plantation, Ormond Plantation, Destrehan Manor, and America's "most haunted home," the Myrtles, in St. Francisville, to name a few. The book also includes behind-the-scenes incidents that occurred during the taping of the documentary. Who is the lady in the photograph whose mirrored reflection appears headless in a bedroom in Oak Alley Plantation? Why are little girls the only tour visitors to experience the taunting of Chloe, a slave and mistress of the owner of the Myrtles in the 1800s? Whose invisible hand had to be repeatedly pushed away from the owner's car horn at Chretien Point Plantation before the owner could get a good night's rest? The spine-tingling explanations for these events and many others are just waiting to be discovered.

In her seventh captivating adventure, Jane Austen finds her crime-solving mettle put to the test in a confounding case of intrigue, murder, and high treason. Among the haunted ruins of an ancient abbey, Jane is drawn into a shadow world of dangerous secrets and traitorous hearts where not only her life is at stake—but the fate of England. As Jane Austen stands before the abandoned ruins of Netley Abbey, she imagines that ghosts really do haunt the centuries-old monastery. But the green-cloaked figure who startles her is all too human and he bears an unexpected missive from Lord Harold Trowbridge, one of the British government's most trusted advisers—and a man who holds a high place in Jane's life. Trowbridge tells Jane about a suspected traitor in their midst—and the disastrous consequences if she succeeds. But is Sophia Challoner, a beautiful widow with rumored ties to Emperor Bonaparte, really an agent of the enemy? Dispatched to Netley Lodge, Jane sets about gaining the confidence of the mysterious and intriguing lady even as Trowbridge's grim prediction bears fruit: a British frigate is set afire and its shipwright found with his throat cut. It's clear that someone is waging a clandestine war of terror and murder. But before Jane can follow the trail of conspiracy to its source and unmask a calculating killer, the cold hand of murder will fall mercilessly yet again—and suddenly Jane may find herself dying for her country. Elegantly intriguing, *Jane and the Ghosts of Netley* is a beautifully crafted novel of wit, character, and suspense that transports Jane and her many fans into a mystery of truly historical proportions—and a case that will test the amateur sleuth's true colors under fire.

Ghost Rock is a guide to sport and multi-pitch rock climbs in the Ghost River and Waiparous Creek areas west of Calgary. It gives detailed route descriptions, along with chapter by chapter parking access and approach details. By local standards, the Ghost has climbing on above average rock. Even with 200 new routes since the first edition it is still, however, woefully underdeveloped. Already a mecca for ice climbers, the Ghost is fast becoming one of the premier rockclimbing areas in Western Canada. It is a virtual candy store of new routes and will remain so for some time to come. Over 35 kilometres of steep cliff line, coupled with its remote and relatively wild nature, make for an unforgettable rock climbing experience.

The Creaking Door

In this book, the authors analyze big data on global interdependence caused by the flows of commodities, money, and people, using a network science approach to obtain differing views of globalization and to clarify the facts on isolation of communities. Globalization reduces international economic inequality, i.e., it allows emerging countries to catch up while it increases relative poverty in some advanced countries. How should this trade-off between international and domestic inequalities be resolved? At the same time, the reduction of biocultural diversity caused by globalization needs to be avoided. What

kind of change is required in local communities to conserve biocultural diversity? On the issue of commodity flow, research results of the supply-chain network, isolation in industry, and resource flows and stocks are presented in this book. For monetary flow, ownership networks, value-added networks, and profit shifting were studied; and regarding the flow of people, linkage of ethnic groups, immigrant assimilation, and refugees were examined. Based on the resulting view of globalization and isolation, the development of the isolation index using machine learning is discussed. Finally, recommendations for evidence-based policymaking in the United Nations are considered.

Ethical questions feature prominently on today's cultural and political agendas. The Ethics of Cultural Studies presents an ethical manifesto for Cultural Studies, an exploration of its current ethical and political concerns, and of its future challenges. The book is concerned with ethics in the material world, and draws on examples as diverse as cloning and genetics, asylum and immigration, experiments in plastic surgery and in electronic and digital art, memories of the Holocaust, September 11th, and media representations of violence and crime. The Ethics of Cultural Studies is a groundbreaking intervention that sets the debate on ethics in cultural study, and offers an invaluable source of ideas for students of contemporary culture.

The Complete Index to Literary Sources in Film

Politicised Cinema demonstrates how taking a collection of seemingly apolitical films and using them as an instrument for serving explicit political aims can be used as a force for good. Through an analysis of *Orient: A Survey of Films Produced in Countries of Arab and Asian Culture*, a film catalogue published by UNESCO and the BFI in 1959 to promote intercultural understanding between the East and the West, this book argues for the importance of studying the ways the interpretation of films can be guided to serve a specific political agenda, even when the films themselves were originally produced with very different aims in mind. The author focuses on how the catalogue positions culture and its cinematic representations as a marker of difference between the Eastern and Western worlds, and shows that even major cultural conflicts such as the Cold War and the decolonisation process can be reframed in service of UNESCO's cultural diplomatic agenda. The book explores the ways in which the catalogue of Eastern films deemed suitable for Western audiences became a weapon to fight against prejudice, intolerance, and bigotry in a politicised battle over dismantling the proclaimed link between difference and conflict. This book will be of interest to students, researchers, and academics in visual politics, cinematic international relations, cultural diplomacy, global governance, and international cultural politics, as well as film studies, Asian studies, and cultural studies. In addition, policymakers and practitioners in the fields of cultural diplomacy and cultural policy will find the empirical case study to be of use in practical work.
