A History of California and an Extended History of Los Angeles and Environs

Excerpt from A History of California, Vol. 1 of 3: And an Extended History of Los Angeles and Environs
Few states of the Union have a more varied, a more interesting or a more instructive history than California, and few have done so little to preserve their history. In this statement I do not contrast California with older states of the Atlantic seaboard, but draw a parallel between our state and the more recently created States of the far west, many years younger in statehood than the Golden State of the Pacific. When Kansas and Nebraska were uninhabited except by buffaloes and Indians, California was a populous state pouring fifty millions of gold yearly into the world's coffers. For more than a quarter of a century these states, from their public funds, have maintained state historical societies that have gathered and are preserving valuable historical material, while California, without a protest, has allowed literary pot hunters and Speculative curio collectors to rob her of her historic treasures. When Washington, Montana and the two Dakotas were Indian hunting grounds, California was a state of a quarter million inhabitants; each of these states now has its State Historical Society supported by appropriations from its public funds. California, of all the states west of the Mississippi river, spends nothing from its public funds to collect and preserve its history. To a lover of California this is humiliating; to a student of her history exasperating. While preparing this History of California I visited all the large public libraries of the state. I found in all of them a very limited collection of books on California, and an almost entire absence of manuscripts and of the rarer books of the earlier eras. Evidently the demand for works pertaining to California history is not very insistent. If it were, more of an effort would be put forth to procure them. The lack of interest in our history is due largely to the fact that California was settled by one nation and developed by another. In the rapid development of the state by the conquering nation, the trials, struggles and privations of the first colonists who were of another nation have been ignored or forgotten. No forefathers' day keeps their memory green, no observance celebrates the anniversary of their landing. To many of its people the history of California begins with the discovery of gold, and all before that time is regarded as of little importance. A History of California and an Extended History of Los Angeles and Environs: Also Containing Biographies of Well-known Citizens of the Past and Present

Winner of the J. B. Jackson Prize from the Association of American Geographers Three centuries ago, the Los Angeles River meandered through marshes and forests of willow and sycamore. Trout spawned in its waters and grizzly bears roamed its shores. The bountiful environment the river helped create supported one of the largest concentrations of Indians in North America. Today, the river is made almost entirely of concrete. Chain-link fence and barbed wire line its course. Shopping carts and trash litter its channel. Little water flows in the river most of the year, and nearly all that does is treated sewage and oily street runoff. On much of its course, the river looks more like a deserted freeway than a river. The river's contemporary image belies its former character and its importance to the development of Southern California. Los Angeles would not exist were it not for the river, and the river was crucial to its growth. Recognizing its past and future potential, a potent movement has developed to revitalize its course. The Los Angeles River offers the first comprehensive account of a river that helped give birth to one of the world's great cities, significantly shaped its history, and promises to play a key role in its future.

A History of California and an Extended History of Los Angeles and Environs

This second volume in Kevin Starr's passionate and ambitious cultural history of the Golden State focuses on the turn-of-the-century years and the emergence of Southern California as a regional culture in its own right. "How hauntingly beautiful, how replete with lost possibilities, seems that Southern California of two and three generations ago, now that a dramatically different society has emerged in its place," writes Starr. As he recreates the "lost California," Starr examines the rich variety of elements that figured in the growth of the Southern California way of life: the Spanish/Mexican roots, the fertile land, the Mediterranean-like climate, the special styles in architecture, the rise of Hollywood. He gives us a broad array of engaging (and often eccentric) characters: from Harrison Gray Otis to Helen Hunt Jackson to Cecil B. DeMille. Whether discussing the growth of winemaking or the burgeoning of reform movements, Starr keeps his central theme in sharp focus: how Californians defined their identity to themselves and to the nation.

HIST OF CALIFORNIA & AN EXTEND

Few states of the United States have a more varied, a more interesting or a more instructive history than California, and few have done so little to preserve their history. In narrating the story of California, the author has endeavored to deal justly with the different eras and episodes of its history; to state facts; to tell the truth without favoritism or prejudice; to give credit where credit is due and censure where it is deserved. This accounts also for the prominence of Los Angeles in the second half of this volume. The consolidation of Los Angeles city and the cities of Wilmington, San Pedro and Hollywood has merged the history of these three into that of the Greater Los Angeles. The early history of these cities is given separately up to their consolidation. All over this book is a real treasure chest and every single of its more than 400 pages is a must-read for the people of California and Los Angeles County.

A History of California, Vol. 1 of 3

A vivid account of the Chinatown race riots in 1871 Los Angeles, now counted among the worst hate crimes in American history.

A History of California, Vol. 3

This title is part of UC Press's Voices Revived program, which commemorates University of California Press's mission to seek out and cultivate the brightest minds and give them voice, reach, and impact. Drawing on a backlist dating to 1893, Voices Revived makes high-quality, peer-reviewed scholarship accessible once again using print-on-demand technology. This title was originally published in 1950.

The Los Angeles River

This volume of original essays by leading scholars is an innovative, thorough introduction to the history and culture of California. Includes 30 essays by leading scholars in the field. Essays range widely across perspectives, including political, social, economic, and environmental history. Essays with similar approaches are paired and grouped to work as individual pieces and as companions to each other throughout the text. Produced in association with the Huntington-USC Institute on California and the West.

Inventing the Dream

It is not the purpose of this work to propose a specific format for the settlement of the city's current difficulties with the valley, to resolve the environmental questions associated with Los Angeles's proposed groundwater pumping program, or to promote any cause associated with the developing situation in the Owens Valley. But by performing the essential historical task of separating what happened from what did not, and by distinguishing in this way the choices which have been made from those which have yet to be decided, it is my hope that this effort will help to establish that common basis for understanding which is essential for the debate over specific issues to proceed most effectively. This book, then, is scarcely the last word on the Owens Valley conflict: the final chapter, after all, has yet to be written. The story that has emerged here is at once very different and more troubling than the conventional treatments of the conflict as a simplistic political morality play. Any attempt to deal with so controversial a subject, however, is almost certain to spark controversy itself. For that reason, with the exception of a small collection of private letters, this work is constructed entirely from the published documents and other materials available to the general public, anchoring the narrative in sources the reader can consult to trace the line of my argument on any point with which he or she may disagree. In addition, the work as a whole has been reviewed for technical accuracy by officials of the Los Angeles Department of Water and Power, although the department is in no way responsible for the content of this study or the conclusions drawn from it.

A History of California and an Extended History of Los Angeles

"'Decline of the Californios' is one of those rare works that first gained fame for its pathbreaking and original nature, but which now maintains its status as a classic of California and ethnic history."--Douglas Monroy, author of "Thrown among Strangers"

The Chinatown War

Charts the social and ethnic history of Spanish-speaking California and the displacement of California's Mexican ranching elite following the Mexican War and the gold rush of 1849.

A Literary History of Southern California

"The most detailed study ever published of Los Angeles' most critical period. . . . An invaluable aid to my understanding of this city."—David Brodsky, author of *L.A. Freeway*

A Companion to California History

Czech it Out: Czech American Biography Sourcebook provides a wealth of information on a variety of sources relating to biographical information on notable Americans with Czech roots. Besides the national figures, also included are information sources on significant individuals at the state, regional, and local levels. Beyond that, we saw it fit to also incorporate ethnic information sources, which frequently contain a wealth of information on pioneer settlers and individuals active at the community

level. Having in mind the interests of genealogists in individual families and their descendents, a listing has also been provided on family histories and genealogies. Even though Czechs have been living in the US practically since colonial times, no composite biographical dictionary exists about the accomplished Czech Americans. Biographical information about them is scattered in a plethora of sources, which are difficult to find and some are not readily accessible. The present author, who, literally, devoted several decades of his life to the study of Czech-American history, has canvassed hundreds of sources at national and local levels to identify, not only notable individuals but also pioneer settlers who played a significant role in the growth and development of the US. This publication should fill a great void in literature until a comprehensive biographical compendium about Czech Americans has been written.

Water and Power

Growing south from the plaza where the city of Los Angeles was founded as a tiny pueblo in 1781, the area now known as downtown L.A. was first developed in the late 1800s as a residential neighborhood, complete with churches and schools. As the population surged at the turn of the 20th century, the downtown area was transformed into a busy business and entertainment center of shops, banks, hotels, and theaters. The explosion of the postcard craze in the early 1900s coincided with this period of downtown's tremendous growth toward a formidable metropolis. This collection of vintage postcards offers a glimpse into the changing city through the 1940s.

The Decline of the Californios

For over three decades the work of Antonia I. Castañeda has shaped the fields of Western History and Chicana Studies. From her early articles on Chicana representation and political economy, to her most recent work mapping gendered violence and gendered resistance in the history of the U.S. Southwest, her work is consistently taught in classrooms and cited extensively. Yet Castañeda's work has been scattered throughout journals and anthologies, a "paper chase" for historians to track down. *Three Decades of Engendering History* ends the chase. This volume, edited by Linda Heidenreich, collects ten of Castañeda's best articles, including the widely circulated article "Engendering the History of Alta California, 1769-1848," in which she took a direct and honest look at sex and gender relations in colonial California. Demonstrating that there is no romantic past to which we can turn, she exposed stories of violence against women, as well as stories of survival and resistance. Other articles included are the prize-winning "Women of Color and the Rewriting of Western History," and two recent articles, "Lullabies y Canciones de Cuna" and "La Despedida." The latter two represent Castañeda's most recent work excavating, mapping, and bringing forth the long and strong post-WWII history of Tejanas. Finally, the volume includes three interviews with Antonia Castañeda, conducted by Luz María Gordillo, that contribute the important narrative of her lived experiences, political perspective, her commitment to initiate and develop scholarship that highlights gender and Chicanas as a legitimate line of inquiry, and her drive to center Chicanas as historical subjects.

Decline of the Californios

A history that is equal parts science and mythology, *Sacred Sites* offers a rare and poetic vision of a world composed of dynamic natural forces and mythic characters. The result is a singular and memorable account of the evolution of the Southern California landscape, reflecting the riches of both Native knowledge and Western scientific thought. Beginning with Western science, poet Susan Sontree carries readers from the Big Bang to the present as she describes the origins of the universe, the shifting of tectonic plates, and an evolving array of plants and animals that give Southern California its unique features today. She tells of the migration of humans into the region, where they settled, and how they lived. Complementing this narrative and reflecting Native peoples' view of their own history and way of life, Sontree recounts the creation myths and songs that tell the story of the First People and of unforgettable shamans and heroes. Featuring contemporary photographs of rarely seen landmarks along with meticulous research, *Sacred Sites* provides unusual insight into how natural history and mythology and scientific and intuitive thinking combine to create an ever-deepening sense of a place and its people.

The Fragmented Metropolis

Delving beneath Southern California's popular image as a sunny frontier of leisure and ease, this book tells the dynamic story of the life and labor of Los Angeles's large working class. In a sweeping narrative that takes into account more than a century of labor history, John H. M. Laslett acknowledges the

advantages Southern California's climate, open spaces, and bucolic character offered to generations of newcomers. At the same time, he demonstrates that--in terms of wages, hours, and conditions of work--L.A. differed very little from America's other industrial cities. Both fast-paced and sophisticated, *Sunshine Was Never Enough* shows how labor in all its guises--blue and white collar, industrial, agricultural, and high tech--shaped the neighborhoods, economic policies, racial attitudes, and class perceptions of the City of Angels. Laslett explains how, until the 1930s, many of L.A.'s workers were under the thumb of the Merchants and Manufacturers Association. This conservative organization kept wages low, suppressed trade unions, and made L.A. into the open shop capital of America. By contrast now, at a time when the AFL-CIO is at its lowest ebb--a young generation of Mexican and African American organizers has infused the L.A. movement with renewed strength. These stories of the men and women who pumped oil, loaded ships in San Pedro harbor, built movie sets, assembled aircraft, and in more recent times cleaned hotels and washed cars is a little-known but vital part of Los Angeles history.

Czech It Out

Chicana Leadership: The "Frontiers" Reader breaks the stereotypes of Mexican American women and shows how these women shape their lives and communities. This collection looks beyond the frequently held perception of Chicanas as passive and submissive and instead examines their roles as dynamic community leaders, activists, and scholars. *Chicana Leadership* features fifteen essays from the notable women's journal *Frontiers: A Journal of Women Studies* that demonstrate the strength and diversity of Chicanas as well as their continuing struggle to have their voices heard. Noted scholars discuss issues ranging from the feminist prototype La Malinche to Chicana writers and national ideology, from gender and identity to ideas of culture and romance, and from tokenism to the diversity within the Chicana community. The essays provide an introduction to an evolving understanding of this diverse community of women and how they interact among themselves, with their community, and with the world around them.

Early Downtown Los Angeles

As Southern California recovered from the collapse of the cattle industry in the 1860s, the arrival of railroads--attacked by newspapers as the greedy "octopus"--and the expansion of citrus agriculture transformed the struggling region into a vast, idealized, and prosperous garden. New groves of the latest citrus varieties and new towns like Riverside quickly grew directly along the tracks of transcontinental railroads. The influx of capital, industrial technology, and workers, especially people of color, energized Southern California and tied it more closely to the economy and culture of the United States than ever before. Benjamin Jenkins's *Octopus's Garden* argues that citrus agriculture and railroads together shaped the economy, landscape, labor systems, and popular image of Southern California. Orange and lemon growing boomed in the 1870s and 1880s while railroads linked the region to markets across North America and ended centuries of geographic isolation for the West Coast. Railroads competed over the shipment of citrus fruits from multiple counties engulfed by the orange empire, resulting in an extensive rail network that generated lucrative returns for grove owners and railroad businessmen in Southern California from the 1890s to the 1950s. While investment from white Americans, particularly wealthy New Englanders, formed the financial backbone of the *Octopus's Garden*, citrus and railroads would not have thrived in Southern California without the labor of people of color. Many workers of color took advantage of the commercial developments offered by railroads and citrus to economically advance their families and communities; however, these people also suffered greatly under the constant realities of bodily harm, low wages, and political and social exclusion. Promoters of the railroads and citrus cooperatives touted California as paradise for white Americans and minimized the roles of non-white laborers by stereotyping them in advertisements and publications. These practices fostered conceptions of California's racial hierarchy by praising privileged whites and maligning the workers who made them prosper. The *Octopus's Garden* continues to shape Southern Californians' understanding of their past. In bringing together multiple storylines, Jenkins provides a complex and fresh perspective on the impact of citrus agriculturalists and railroad companies in Southern Californian history.

Three Decades of Engendering History

"An important book [which] provides the first detailed analysis of the changes that transformed one of the most important Mexican pueblos in the Southwest into a Chicano urban barrio. Using quantitative

data together with traditional secondary and primary historical sources, the author traces the major socio-economic, political, and racial factors that evolved during the post-Mexican War decades and that created a subordinate status for Mexican Americans in a burgeoning American city."--Western Historical Quarterly "Griswold del Castillo's history of the Mexican community during the first decades of the 'American era' . . . concentrates on the mechanisms which the community adopted as it was confronted by changes in the economic structure of the region, the in-migration of Anglo-Americans as well as Mexicans, and by the effects of racial segregation on the community. [The] aim is to reveal the history of a community undergoing rapid social and economic change, not to write the history of one society's domination of another."--UCLA Historical Journal "Los Angeles Chicanos emerge not as the homogeneous, passive victims of stereotypical fame, but as internally diverse, active participants in the simultaneous struggles to maintain their socio-cultural fabric and to capture a part of the American Dream. The author effectively demonstrates that the Chicano decline occurred not because of cultural weaknesses but as the almost inevitable result of Anglo prejudice, numerical domination, and control of political and economic institutions. . . . an admirable book and a fine piece of scholarship."--American Historical Review

Typed manuscript copy.

Sunshine Was Never Enough

The Cucamonga Valley was once America's largest wine-producing region, crafting quality vintages decades before Napa and Sonoma. Secondo Guasti, an ambitious and enterprising Italian immigrant, established the region's first vineyard in 1901, and others soon followed. Wineries like the Vai Brothers, Padre, Galleano, Brookside and more made the valley the epicenter of a burgeoning industry. Not even Prohibition could halt production. While domestic breweries and distilleries shuttered, Cucamonga's brandy and sherry continued to be legally made for culinary and medicinal purposes. Yet by the late 1970s, harvests had dwindled and vineyards vanished. Urbanization, vine disease and property taxes effectively ended production. Today, local vintners and wine enthusiasts are reviving the region's proud heritage. Authors George M. Walker and John Peragine uncork a legacy too delectable to die.

The Urban Establishment

This classic history is filled with colorful pathmarkers like Jedediah Smith, John C. Frémont, and Kit Carson; with packers, home seekers, and mail couriers; and with horse thieves and enslavers of Indian women and children.

Chicana Leadership

Octopus's Garden
